Computerized Testing

Each year, millions of clock drawing tests are administered worldwide. This is the first and only fully computerized Clock Drawing Test, designed to save hospitals, militaries and agencies significant time and expense to rapidly detect TBI, a leading cause of death and disability. All tests are administered through a software product. Instant scores, reports, and feedback are provided through this low-cost and high-tech test.

This Automatic Clock Drawing Test™ effectively reduces patient wait time and costs associated with the administration of other cognitive tests.

Automatic Clock Drawing Tests™ are powerful weapons in the global battle against Traumatic Brain Injury, a serious challenge due to shrapnel wounds and blast wave phenomena .

*Start screening and
rehabilitating your
subjects and soldiers
now for TBI using the
ACDT-TBI-07.*
