Automated Operation

SpecialtyAutomated™ introduces the first and only fully computerized Clock Drawing Test designed to save militaries and agencies significant time and expense to rapidly detect TBI. Instant scores, reports, and feedback are provided through a unique software application.

Automation of this test effectively reduces patient wait time and costs associated with manual administration of other cognitive tests.

Automatic Clock Drawing Tests™ are powerful weapons in the global battle against TBI, the leading cause of disability and death.

This test includes computerized verbal learning and memory tests to monitor long-term changes in patients after head injury and to improve the recovery process.

An online version of this test is also available exclusively by SpecialtyAutomated.

Start screening and rehabilitating your subjects and soldiers now for TBI using the ACDT-TBI-M-07.
