

MEDICAL DYNAMIC VISUAL ACUITY TEST

MODEL DVA-MEDI-07

Rapid, sensitive, and automated Dynamic Visual Acuity screening test
for hospitals, clinics, rehabilitation centers, and government agencies by SpecialtyAutomated™

Features

- Very fast
- Objective
- Self-service administration
- Instant scores & feedback
- Immediate, detailed reports
- Graphical & statistical review
- Scientifically proven
- Completely computerized
- Multimedia & interactive
- User friendly
- English & foreign languages
- Easily exports data
- Standardized & paperless
- Touch screen Sytotechnology™
- Useful for all ages & cultures
- Engage the physically challenged and examinees with special needs

Screens

- Contrast sensitivity
- Integrated distances for far, near, & intermediate acuity (left & right eyes, binocularity)
- Night dynamic visual acuity option

Automated Operation

SpecialtyAutomated™ introduces the first and only *rapid and fully computerized* Dynamic Visual Acuity Screening Test to provide instant scores, reports, statistics, and feedback through a unique online and web-based application. All tests are accessible through networked laptops, portable kiosks, or PCs.

The National Academy of Sciences reports that dynamic visual acuity (DVA) is “...most predictive of real-world task performance...” Contrast sensitivity and DVA, combined, are recommended for a stronger measure of daily visual acuity. Several studies show that dynamic visual acuity is a reliable predictor of crash probability when compared to static visual acuity.

Reduce wait time. Automate your office today.

Start improving vision safety now by rapidly screening the dynamic visual acuity of your subjects and patients using the DVA-MEDI-07 by SpecialtyAutomated™.
