

AUTOMATED DRIVER'S LICENSE ROAD SIGN KNOWLEDGE TEST SOFTWARE MODEL KT-RS-DMV-07

Rapid, sensitive, and computerized tool that exceeds ReFb-06™ requirements

for Driver's license offices, transportation research institutes, and other transport agencies by SpecialtyAutomated™

**No paper. No downloads. No hassles.
Use your own computer.**

Benefits

- Completely computerized
- Very fast, sensitive, & objective
- Self-service option
- Instant scores & feedback
- Scientifically proven
- Multimedia & interactive
- User friendly
- Many foreign languages
- Easily exports data
- Touch screen option
- Standardized & paperless tests
- Useful for all ages & cultures
- Ideal assistive technology
- Optimized for repeated administration
- Compliant with 21 CFR Part 11, HIPPA, ICH GCP, & ISO 9001:2000

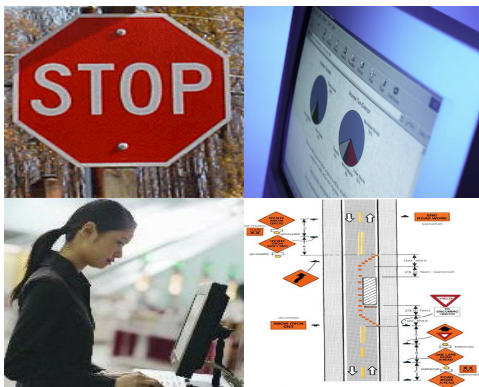

Automated Testing

SpecialtyAutomated™ introduces the very best and only *fully computerized* road sign knowledge test for driver's license departments. Instant scores and feedback are provided through our exclusive software application.

Unlike any other road sign recognition test, the KT-RS-DMV-07 is designed on the basis of studies of millions of collisions and driver behavior mechanisms. These were featured in published government reports. The KT-RS-DMV-07 functions as a self-service test that screens sign recognition through identification of some of the most severe types of collisions and the associated driving behaviors needed to safely react to various road or traffic conditions. This tool is what improving road safety is all about.

This test effectively reduces client wait time and equipment costs associated with manual and semi-computerized tests. Importantly, it enables staff to dedicate valuable time to other tasks.

Start improving road and transport safety now by rapidly screening drivers using the KT-RS-DMV-07 by SpecialtyAutomated™.
