- User friendly
- English language
- Foreign language option
- Easily exports data
- Standardized & paperless
- Option for Touch screen Sytotechnology™
- Useful for all cultures
- Engages physically challenged people who cannot draw or use an instrument to write

Post Traumatic Stress Disorder (PTSD) impacts thousands of soldiers, veterans, and victims of war and terror. PTSD is a leading cause of depression and suicide. PTSD costs billions of dollars for diagnosis and treatment. Now everyone can engage in a fully automated and low-cost battery available as SOFTWARE or ONLINE to detect PTSD in about 5 minutes or less.

Automated Operation

SpecialtyAutomated™ introduces the first and only fully computerized collection of PTSD (Post Traumatic Stress Disorder) screening tests designed in accordance with the current standards of American Psychiatric Association: *Diagnostic and Statistical Manual of Mental Disorders*, an authoritative text. This battery optimizes time and management of data collection, processing, and review. The PTSD-SA-0811 is a high-tech and low-cost tool that rapidly screens and monitors subjects. Instant scores, reports, statistics, and feedback are provided through this unique online and web-based application. All tests are accessible through networked laptops, portable kiosks, and/ or PCs.

SpecialtyAutomated Post Traumatic Stress Disorder PTSD Test Battery™ offers the option for simple and self-service administration to detect PTSD in small and very large populations. The battery of tests allows researchers to monitor short-term and long-term changes in subjects anywhere through our unique Internet database and systems.
