- English & foreign languages
- Easily exports data
- Standardized & paperless
- Touch screen option
- Useful for all ages & cultures
- Designed in accordance with International Council of Ophthalmology standards
- Engages the physically challenged and examinees with special needs

Automated Operation

SpecialtyAutomated™ introduces the first and only fully computerized static visual acuity (SVA) screening test for hospitals, clinics, offices, and rehabilitation centers. Instant scores and feedback are provided through a unique software application. This effectively reduces patient wait time and equipment costs associated with manual and semi-computerized vision screening tests. Importantly, it enables staff to dedicate valuable time to other tasks.

Contrast sensitivity and SVA, combined, are recommended for a stronger measure of visual acuity. This screening test is a significant improvement over the Snellen Eye Charts of the 1860s and the vision testers of the 20th century. Automate your office today.

*Start rapidly screening and monitoring patients now using the **SVA-MEDI-07** by *SpecialtyAutomated*™.*

Screens

- Static Visual Acuity
- Contrast sensitivity
- Night visual acuity option
