- HIPPA, ICH GCP, & ISO 9001:2000

Screens

- Static visual acuity
- Sign recognition
- Solar glare recovery & night glare recovery

Online Testing

This is the quickest online static visual acuity (SVA) screening test battery. Instant scores, reports, statistics, and feedback are provided through our unique web-based application that enables simultaneous review and comparison of data in real time.

Contrast sensitivity and SVA, combined, are recommended for a stronger measure of visual acuity. This screening test is a significant improvement over the Snellen Eye Charts of the 1860s and the vision testers of the 20th century. Ambient light and weather conditions are standard features in this vision skills battery that enable testing unlike anything available. This battery may be used to assess the vision of drivers.

Click and connect your office today.

Start screening and monitoring subjects now using the SVS-MEDI-08 by SpecialtyAutomated™.

Also screens

- Weather vision & wind vision
- Contrast sensitivity ("fog vision")
- Night visual acuity
- Stereopsis
- Optional color perception
