- Standardized & paperless
- Immediate, detailed reports
- Scientifically proven
- Completely computerized
- Multimedia & interactive
- User friendly
- English & foreign languages
- Easily exports data
- Touch screen option
- Useful for all ages & cultures
- Engages physically challenged examinees

Screens

- Contrast sensitivity
- Dynamic visual acuity
- Night dynamic visual acuity
- Stereopsis
- Sign recognition
- Dynamic solar glare recovery & night driving glare recovery
- Dynamic weather vision & wind vision
- Optional color perception

Automated Operation

SpecialtyAutomated™ introduces the first and only fully computerized package of dynamic visual acuity screening test products for driver's license departments. Weather, wind, solar glare, and night driving glare are now exclusively available. Instant scores, reports, and feedback are provided through an exclusive unique software application.

The National Academy of Sciences reports that dynamic visual acuity is "...most predictive of real-world task performance...." Contrast sensitivity and Dynamic Visual Acuity, combined, are recommended for a stronger measure of daily visual acuity. Several studies show that dynamic visual acuity is a reliable predictor of crash probability when compared to static visual acuity.

This test effectively reduces patient wait time and equipment costs associated with manual and semi-computerized vision screening tests. Importantly, it enables staff to dedicate valuable time to other tasks.

Start improving road and transport safety now by comprehensively screening drivers using the VT-DVA-DMV-07 by SpecialtyAutomated™.
