© 2006, 2007, 2008 Specialty Automated Systems Corporation. All rights reserved.
"Using online testing systems, such as the Specialty Automated Automatic Clock Drawing Tests™ and Specialty Automated Dynamic Visual Acuity Tests™, enable testing to be done more quickly, ensure that the potential for tester bias is virtually eliminated, and in general conserve time and resources. Seeing the Automatic Clock Drawing Test™ work at Mae Volen was fascinating -- the seniors easily adapted to the computer-based testing and appeared to look upon taking the test as a personal challenge. More importantly, the results of online testing mirrored the results that we know were obtained using the traditional assessments done of the individuals who used the automated tests. And, in some cases the Automatic Clock Drawing Tests identified individuals who had not yet been formally diagnosed with a cognitive disorder. In sum, the Specialty Automated testing methods worked and worked quickly."

- Brenda K. Bryant, Vice President

Mae Volen Senior Center

About the Mae Volen Senior Center
In 2008, the Mae Volen Senior Center will celebrate 40 years of serving seniors in South Florida. The Center provides a continuum of services to the South Florida community, ranging from in-home services, private care management, and adult day care to support groups and active senior programming like computer classes. The Center emphasizes intergenerational living, provides activities that acknowledge what seniors can do, and strives to ensure that seniors and their families experience the joys of life, throughout life.

Mae Volen is a premier Senior facility that now celebrates its 40th year. Happy Birthday, Mae Volen!
We are now green!

It had to happen.

While we originally started as a company that designed and manufactured kiosks and other cabinets to support our automated test products and systems, our concern for the environment led us to a new, completely online format. SpecialtyAutomated and its newest division, Online Test Solutions™, are both green because all Internet-based tests and solutions are paperless and do not require any software. Since trees are cut for wood and wood is processed for paper, fewer trees are cut when there is little demand or use for paper. When trees are maintained and grown, our environment and, ultimately, our planet, become more green or eco-friendly. Online tests also do not require any software, CD-ROMs, flash drives, or heavy or special equipment. Software, flash drives, and CD-ROMs become obsolete or defective. Some even create conflicts with existing software or interfere with the performance of computers. Importantly, millions of CD-ROM and DVD disks end up in landfills and incinerators each year. These disks create unnecessary pollution and harm to the environment and atmosphere.

SpecialtyAutomated online tests and systems are administered over a client’s networked computers. No new or heavy hardware, cabinets, kiosks, modular units, synthetic materials, equipment, or other devices are needed. Such items tend to be designed from metals, plastics, and wood that damage the environment.

Buy green. Go green.

Make this world a better place for everyone.
Featured Products

Our totally new approach to online screening tests provides you with powerful tools to easily manage and administer all aspects of your entire screening test program. Our products represent the very best value.

The following new, exciting, and never-before-seen automated products are available only through SpecialtyAutomated:

►**Online Dynamic Visual Acuity Tests**  New!
Just what the doctor ordered. This is NASA technology that is no available in a web-based form to provide a more comprehensive and realistic measure of everyday tasks.

►**Dyna-VACS™** *
Dynamic Visual Acuity Contrast Sensitivity Screen.
This is a fun and simple vision screening test that anyone can easily take. Powered by Sytotechnology™. No more long lines. Automatic scoring and feedback. Validated studies show it takes about 3 minutes to complete.

►**DynaStat-VACS™** **

►**Automatic Clock Drawing Test™**  New!
Each year, millions of clock drawing tests are issued worldwide. We offer a family of Times2Tell™ products that completely computerize and standardize the Clock Drawing Test! No more paper and pencils! This is our most popular screening test for cognition and driving ability assessment. Ideal for nursing homes, hospitals, and health programs. Validated studies show it’s at least 3 times faster than the paper-based Clock Drawing Test! This test has been featured in numerous journals and reports.

►**Military Times2Tell™**  New!
An Automatic Clock Drawing Test for military and international clientele who are familiar with a 24-hour clock rather than a US standard clock.

All Dyna-VACS™ and DynaStat-VACS™ products are available with optional night vision, weather vision, and color vision features. Foreign language versions available.

**Vision Skills Screening**

Each year, millions of drivers are injured and thousands of drivers are killed due to visual challenges on the road. On the transportation infrastructure, others, such as pilots, captains, and conductors experience similar challenges. SpecialtyAutomated now offers the most advanced forms of vision screening to improve transportation safety. Select from a menu of these features to comprehensively screen your clients:

- **Fog Vision** New!
- **Wind Vision** New!
- **Solar Glare Recovery** New!
- **Night Glare Recovery** New!
- **Night Vision**

Add any one of our traffic sign tests, in numerous languages, for an even more comprehensive assessment of your clients.

**Online Trail Making Test** New!

The Trail Making Test is a traditional neuropsychologic assessment tool that was originally designed by the U.S. Army as part of the Army Individual Test Battery in 1944. Nearly 65 years later, SpecialtyAutomated offers completely standardized, rapid, paperless, and online versions of the Trail Making Test, Trails A, Trails B, and a full line of Trail Making Tests and Systems, to engage speakers of other languages as well as those who are unable to write or hold a writing instrument. No CD-ROMS or software are needed. Part A and Part B and may be used in conjunction with other tests to form a battery. At SpecialtyAutomated, we offer many batteries for ease and rapidity when comprehensively screening the cognition of numerous subjects.

**Online Trail Making Test A**

This popular online test can be used alone or in combination with other tests to provide a more thorough screening mechanism of cognitive domains.

**Online Trail Making Test B**

The American Medical Association recommends administration of the Trail Making Test and the Clock Drawing Test to assess older drivers for fitness to drive determinations. Nevertheless, this popular online test can be used alone or in combination with other tests to provide a more thorough screening mechanism of cognitive domains.

BENEFITS OF ALL
Specialty Automated
ONLINE TESTS
Internet-based Operation

We offer the very best features:

- Very fast
- Objective
- Instant scores & feedback
- Immediate, detailed reports
- Graphical & statistical review
- Scientifically proven
- Completely computerized
- Multimedia & interactive
- User friendly
- Easily exports data
- Standardized & paperless
- Touch screen Sytotechnology™ option
- Useful for all ages & cultures
- Review & access test scores in real-time
- Secure network with password-protected login
- Totally green and eco-friendly tests & systems
- Ideal assistive technology
- Engages examinees with special needs and the physically challenged who cannot draw or use an instrument to write.

All Specialty Automated online tests are available in English and many foreign languages, including but not limited to Arabic, Chinese, Dutch, French, German, Japanese, Korean, Russian, and Spanish.

Go green with us.

Now is the time to order your online tests and systems.
WELCOME

Our model is simple. It’s based on the ESRA Dynamic Assessment for Transportation™ (ESRA DAT ™) and ESRA Dynamic Vision Assessment for Transportation ™ (ESRA DVAT ™). These distinct patents-pending inventions were nominated by the U.S. Department of Transportation for a prestigious award through the Federal Highway Administration and extensively published in numerous government reports. Many Departments of Motor Vehicles (DMV) rely on these publications for driver’s license test design, policy development, and product evaluation. The Secretary of State for Transport’s Honorary Medical Advisory Panel on Driving and Visual Disorders of the United Kingdom recently noted one of these publications. Collectively, these publications cite numerous patents-pending products and systems invented by members of our executive staff.

Unlike others in contracting and manufacturing, Specialty Automated Systems Corporation (SpecialtyAutomated) is a totally independent product design and manufacturing firm dedicated to your best interests in mind. The use of an independent product design and manufacturing firm can also reduce or eliminate the need for in-house engineering and support staff. There is a potential for overall and significant cost savings associated with labor and time when any process is online. Our products and systems represent the best values available because we support our clients’ goals and strategic initiatives. As a designer and manufacturer of online tools, we support the environment with green, eco-friendly solutions.

At SpecialtyAutomated, we strive to improve workplace performance through a full range of high-quality and low-price online screening test products and systems. To fulfill this mission, we constantly innovate, invent new products, and add to our capabilities to provide you with world-class automated solutions. Our off-the-shelf and custom screening tests are fast, standardized, and objective. This catalog, which we will constantly update, is a testament to our excellence.

Welcome.

Go green with us.
The **ESRA Dynamic Assessment for Transportation** (ESRA DAT™) is available now, in whole or in part, **exclusively** at Specialty Automated Systems Corporation.

Start reducing lines, saving time, and improving lives now.

Hospitals, driver's license bureaus and other transportation agencies around the world can benefit through use of the ESRA DAT™ for driver's license testing, screening, and renewals. The online products and systems offered by Specialty Automated are fast, objective, and affordable.

The **SpecialtyAutomated** tests are ideal for those who need to test new drivers, prepare or train for licenses, renew licenses, conduct periodic screening, have special licensing needs, monitor patients, or require rehabilitation or recovery.

The ESRA DAT™, modified and featured in FHWA-AZ-04-559(1) Report, Research Note, and © 2005 ESRA Consulting Corporation. - HAZMAT
- BUS DRIVERS
- MARITIME
- AVIATION
- RAIL
- INSURANCE AGENCIES
SpecialtyAutomated is the only company *exclusively* dedicated to the world’s largest selection of off-the-shelf and custom online and multimedia screening tests and systems for vision, vision attention, cognition, knowledge, and operation skills. The need for safety and security in the transportation sector is limitless. According to recent publications, no automated screening systems exist in any transportation agency. Vision screening tests in driver’s license bureaus in the U.S., U.K., Australia, Canada, and New Zealand rely on subjective and non-automated technologies based on the Snellen eye charts of the 1860s. In medical facilities, a lack of staff and automated technologies preclude rapid and adequate screening tests.

Senior drivers, teen drivers, and novice drivers constitute a disproportionate number of at-fault collisions. Adequate screening is now direly needed to reduce thousands of fatalities and injuries and millions of collisions each year.

Equally important is the requirement for screening tools in the recovery and rehabilitation fields. Recent studies show that over the next 20 years, dementia is expected to increase 400%. These individuals, once identified, may continue to operate vehicles and carry out daily activities. However, many physicians and medical practitioners are either unqualified or understaffed to make such determinations. Our products provide the objectivity that medical and clinical facilities require. Senior drivers, in particular, have very special needs in terms of screening tests. SpecialtyAutomated Systems Corporation is poised to meet those needs. Rapidly. Effectively. Easily. Affordably. Our screening tools, from automated vision screening tests to our exclusive Automatic Clock Drawing Test™, will empower people of all ages, especially the elderly and individuals with special needs.

All online screening tests by SpecialtyAutomated are objective, fast, and low-cost. They serve government agencies, hospitals, schools, and rehabilitation clinics. SpecialtyAutomated products and systems are an immediate solution to the growing state, national, and international problem of long lines and wasted fuel. Our products are available in different languages and in special needs options (e.g., audio). Automation by SpecialtyAutomated streamlines testing operations, improves service, and controls costs.

SpecialtyAutomated anticipates extraordinary growth in the transportation and medical sectors in the next fifty years as more people seek licenses and live longer. Our proprietary products and systems are available to meet such needs and possibilities today. Numerous inventions, books, and authoritative government publications are unmatched evidence of our expertise.
At Specialty Automated Systems Corporation, you can select the best and only online products and systems associated with vision, cognition, knowledge, and driving skills. Strong records of publication and unparalleled experience support our inventory.

We offer:

• unique proprietary products and systems based on the only multi-functional automated screening test systems ever invented

• products with true low-cost operations

• fast, objective, standardized, and user-friendly products capable of customization

• significant savings in labor and overhead costs

• cutting-edge online assistive technology tests

• attention to multilingual, foreign, illiterate, and/ or special needs populations (individuals with visual, hearing, physical, and/ or speech impairments)

• green, eco-friendly solutions
BENEFITS

Our online screening tests and systems allow for:

- *objective, rapid, uniform*, and low-cost alternatives to standard non-automated techniques.
- significant savings in labor, paper, and overhead costs.
- reduction of long lines and waits.
- replacement of paper-based tests.
- standardized assessments that are not reliant on the experience of the examiner.
- the opportunity to promote safety in all sectors of transportation, including but not limited to roads, aviation, trains, maritime, motorcycles, trucks, military, among others.
- vision screening techniques other than standard visual acuity testing for assessing all drivers and, in particular, at-risk drivers, novice drivers, and senior drivers.
- an elimination of monotony and memorization of charts, paper-based tests, and other non-automated techniques.
- opportunities to perform frequent screening of licensees.

Go green with us!

Start reducing paperwork and software usage now!
Our online screening tests and systems also allow for:

- Use of your own computer with Internet access.
- Mobility and ease of testing.
- Effective strategies for screening of visual impairments.
- Screening tools based on national and international standards.
- Evaluating fitness to drive or operate motorized vehicles.
- Reducing the likelihood of duplicate driver’s licenses that can pose national safety and security threats.
- Testing of individuals with special needs or speakers of other languages.
- Considerable savings on the sale, rental, or lease of expensive, heavy, and bulky equipment or devices.

APPLICATIONS

Specialty Automated

Our online screening tests and systems may be used for education, health, military, research, sport, transport, and workplace industries worldwide such as:

- Clinical evaluations.
- Medical screening examinations.
- School reviews.
- Driver’s license tests, training, and review.
- Pilot studies and programs.
- Cognition assessments.
- Human factors research & industrial safety
- Insurance companies
- Ergonomic improvements.
- Expeditious operations.

As you can see, SpecialtyAutomated Systems Corporation is much more than your typical simulation company. We’ve assembled a unique blend of hundreds of high-quality and low-cost online screening test products, state-of-the-art screening test systems, and professional services specifically designed to meet today’s challenges. And we continue to build on our unmatched experience through constant innovation, creation of new products, and enhancements to our services.

Whether you’re planning a new screening test program, a green and eco-friendly strategy, or just seeking ways to enhance your current screening test system, you can count on SpecialtyAutomated as a value-added component of your total screening test solution. So contact us to today, at: http://www.onlinetestings.net to learn more about how we can help you turn potential into performance and savings. In addition to the products and systems featured in this catalog, we welcome custom orders. Let our interactive and self-service multimedia, ONLINE products and systems fit into your plans today.

At SpecialtyAutomated, all of our tests and systems are delivered ONLINE. No expensive equipment or heavy setups are needed. Use your own computer and Internet connection!
We are now green!

SpecialtyAutomated proudly introduces the first and only fully Online, standardized, validated, and rapid Clock Drawing Tests (CDT)

Meet the Automatic Clock Drawing Test™

Only SpecialtyAutomated eliminates the paper-based CDT to save you money and time with its fully computerized clock drawing tests!

Each year, millions of Clock Drawing Tests are administered worldwide due to unique psychometric properties and clinical utilities. Studies show that the Clock Drawing Test may screen for cognitive dysfunction secondary to dementia, delirium, or various neurological and psychiatric illnesses. Other studies show that the CDT differentiates cognitively normal older adults from those with at least mild dementia of the Alzheimer type, detects moderate and severe cognitive impairment in a community elderly population, screens and monitors soldiers for Traumatic Brain Injury (TBI), and provides early indication of neurological dysfunction or autism.

The CDT may be used as an independent assessment tool for nursing home admission, assisted living admittance, 24-hour retirement community care, pharmaceutical research, or as potential indicators of driving problems in the elderly. The Clock Drawing Test may be used alone or in combination with other screening tools to assess cognitive or visuospatial impairment. The CDT is one of two cognitive tests recommended by the American Medical Association. It is also incorporated into older driver traffic safety standards developed by the National Highway Traffic Safety Administration.

Automation of the Clock Drawing Test now offers quick screening and automatic scoring and feedback. This translates to significant money, time, labor, and overhead savings. You and your clients will love Automatic Clock Drawing Tests™ by SpecialtyAutomated.

Times2Tell™ developed by and exclusively available at SpecialtyAutomated is the only online version of the traditional Clock Drawing Test. Military Times2Tell™, also uniquely designed and manufactured by SpecialtyAutomated, is the only online version of the Clock Drawing Test ideal for the military, war veterans, and international clientele who know 24-hour clocks instead of standard time. Order your online Automatic Clock Drawing Test™ today!
“….Seeing the Automatic Clock Drawing Test™ work at Mae Volen was fascinating -- the seniors easily adapted to the computer-based testing and appeared to look upon taking the test as a personal challenge. More importantly, the results of online testing mirrored the results that we know were obtained using the traditional assessments done of the individuals who used the automated tests. And, in some cases the Automatic Clock Drawing Tests identified individuals who had not yet been formally diagnosed with a cognitive disorder. In sum, the Specialty Automated testing methods worked and worked quickly.” - Brenda K. Bryant, Vice President, Mae Volen Senior Center

►► Automatic Clock Drawing Test™
MODEL ACDT-MEDI-08

This is a Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment, & Dementia Screening Test for hospitals, clinics, rehabilitation centers, research institutes, and government agencies

Each year, millions of clock drawing tests are administered across the world. This is the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data worldwide in real time. This test effectively reduces wait time and costs associated with manual administration, semi- computerization, and use of other cognitive tests. No other visual attention assessment is as sensitive as the Automatic Clock Drawing Test™. Studies show that Automatic Clock Drawing Test™ results correlate with crash risk. Automatic Clock Drawing Tests™ are powerful weapons in the global challenge against brain injury, cognitive impairment, and dementia. Online Automatic Clock Drawing Tests™ offer great potential for fitness-to-drive evaluations to reduce crashes. Optional computerized verbal learning and memory tests are available to monitor long-term changes in patients after head injury and to improve the recovery process.

►► Automatic Military Clock Drawing Test™
MODEL ACDT-MIL-08

This is a Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment, & Dementia Screening Test for militaries, hospitals, clinics, rehabilitation centers, research institutes, and government agencies

Each year, millions of clock drawing tests are administered across the world. This is the first and only fully web-based Military Clock Drawing Test, one of the most widely used cognitive assessment tests, to serve military and international clientele who know military time, also known as international time. No more paper-based tests. This computerized tool provides Instant scores, reports, statistics, and feedback through a unique web-based application that enables simultaneous review and comparison of data worldwide in real time. This test effectively reduces wait time and costs associated with manual administration, semi- computerization, and use of other cognitive tests. No other visual attention assessment is as sensitive as the Automatic Clock Drawing Test™. Studies show that Automatic Clock Drawing Test™ results correlate with crash risk. Automatic Clock Drawing Tests™ are powerful weapons in the global challenge against brain injury, cognitive impairment, and dementia. Optional computerized verbal learning and memory tests are available to monitor long-term changes in soldiers after head injury and to improve the recovery process.
Cognitive Test Battery for Pilots (Aviation)

Online Cognitive Test Battery for Pilots
MODEL ACDT-P-08

This is a rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment Screening Test for worldwide selection, training, monitoring, & rehabilitation of pilots

This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the Trails B Test. This powerful battery is designed to save airlines significant time, labor, and expense to rapidly screen and monitor pilots for cognitive decline or impairment.

Our cognitive test battery offers great potential for fitness-to-fly evaluations to reduce injuries, aid medical decisions, and optimize the performance of pilots. These tools, and especially our Automatic Clock Drawing Test ™, ensure that pilots of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally. This tool screens cognitive dysfunction, memory, numerical knowledge, visual perception, visual processing, visual attention, selective and divided attention, time conceptualization, visuospatial skills, and executive skills.

Online Cognitive Test Battery for Sports
MODEL ACDT-SM-08

A Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment Screening Test for worldwide selection, training, monitoring, & rehabilitation of athletes

This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the Trails B Test. This powerful battery is designed to save sport teams significant time, labor, and expense to rapidly screen and monitor athletes for brain injury or concussion. All tests are administered online through networked computers and laptops. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between teams, coaches, and physicians, in real time. This battery effectively reduces wait time and costs associated with the use of other cognitive tests. Our cognitive test battery offers great potential for fitness-to-play evaluations to reduce injuries, aid medical decisions, and optimize the performance of athletes. These tools, and especially our Automatic Clock Drawing Test ™, ensure that players of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally.

Start screening and monitoring cognitive dysfunction, memory, numerical knowledge, visual perception, visual processing, visual attention, selective and divided attention, time conceptualization, visuospatial skills, and executive skills now.
Comprehensive Cognitive Test Battery (Medical, Research)

►► Comprehensive Online Cognitive Test Battery with Reaction Time Tests and Automatic Clock Drawing Test ™
MODEL ACDT-RE-08

Rapid, sensitive, & fully Internet-based tests for research, clinical, and transportation license test applications (including automated driver’s license test applications)

Includes 4 distinct tests:
- Automatic Clock Drawing Test ™
- Choice R(x) RE-07 ™ (to test for choice reaction time)
- Non R(x) RE-07 ™ (to test for non-reaction time)
- Reaction R(x) RE-07 ™ (to test for reaction time)

No other cognitive test is as simple, rapid, & sensitive!

►► Traumatic Brain Injury & Memory Test Battery
MODEL ACDT-TBI-M-08

A Rapid, Sensitive, and Internet-based Traumatic Brain Injury & Memory Screening Test for hospitals, militaries, clinics, and other agencies.

Each year, millions of clock drawing tests are administered worldwide. This battery includes the first and only fully web-based Clock Drawing Test and is designed to save militaries and agencies significant time and expense to rapidly screen, detect, and monitor Traumatic Brain Injury, TBI. All tests are administered online through networked computers and laptops. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world in real time. Automatic Clock Drawing Tests ™ are powerful weapons in the global battle against TBI, the leading cause of disability and death. TBI is a serious challenge due to shrapnel wounds and blast wave phenomena. Online testing effectively reduces patient wait time and costs associated with administration of other cognitive tests. This test engages individuals who are unable to write or hold a writing instrument. It includes online verbal learning and memory tests to monitor long-term changes in patients after head injury and to improve memory and the recovery process.
Online Traumatic Brain Injury Screening Test
MODEL ACDT-TBI-08

A Rapid, Sensitive, and Internet - based Traumatic Brain Injury Screening Test for hospitals, militaries, clinics, and other agencies.

Each year, millions of clock drawing tests are administered worldwide. This is the first and only fully web-based Clock Drawing Test, designed to save hospitals, militaries and agencies significant time and expense to rapidly detect TBI, a leading cause of death and disability. All tests are administered online through networked computers and laptops. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world in real time. This online Automatic Cock Drawing Test effectively reduces patient wait time and costs associated with the administration of other cognitive tests. Automatic Clock Drawing Tests ™ are powerful weapons in the global battle against Traumatic Brain Injury, a serious challenge due to shrapnel wounds and blast wave phenomena. sensitive, and & Internet – based Traumatic Brain Injury Screening Test

Automatic Clock Drawing Test (Times2Tell ™ )
MODEL SA-01- T2T -W

This is our first and only fully automated and rapid clock drawing s test. Screens patients on the ability to tell standard time, describe movement, and respond to timepieces. Quickly and Easily. May be used in combination with other automated assessments to determine driving ability, admission into nursing homes, hospitals, and health programs. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages. Validated studies show that this test is at least three times faster than the paper-based Clock Drawing Test. Plus, it can function autonomously.

(Automatic Clock Drawing Test) Driving Times2Tell ™
MODEL SA-01- DT2T -W

This is the first and only fully automated and rapid clock drawing test for screening older drivers and drivers with potential cognitive impairment. Quickly and easily screens patients on the ability to tell time, describe movement, and respond to timepieces through the incorporation of criteria prescribed by the National Highway Traffic Safety Administration (NHTSA). May be used in combination with other automated assessments. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages.
► Automatic Clock Drawing Test (Military Times2Tell™)
MODEL SA-01- MT2T-W

This is the first and only fully automated and rapid clock drawing test. Screens patients on the ability to tell military time (also called “international time”), describe movement, and respond to timepieces. Quickly and Easily. May be used in combination with other automated assessments to determine admission into nursing homes, hospitals, and health programs for military, veteran, and international patients who know 24-hour clocks instead of AM and PM. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages.

► Automatic Clock Drawing Test (Driving Military Times2Tell™)
MODEL SA-01- DMT2T-W

This is the first and only fully automated and rapid military time clock drawing test for screening older drivers and drivers with potential cognitive impairment. Quickly and easily screens military, veteran, and international patients who know 24-hour clocks instead of AM and PM on the ability to tell time, describe movement, and respond to timepieces through the incorporation of criteria prescribed by the National Highway Traffic Safety Administration (NHTSA). May be used in combination with other automated assessments. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages.

► Times2Tell™ Exercises (Automatic Clock Drawing Test)
MODEL SA-01- T2TE-W

Stimulate the mind with numerous exercises from the first and only fully automated and rapid clock drawing test. Stimulates patients on the ability to tell standard time, describe movement, and respond to timepieces. Quickly and Easily. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages. Great for occupational therapy and rehabilitation.

► Military Times2Tell™ Exercises (Automatic Clock Drawing Test)
MODEL SA-01- MT2TE-W

Stimulate the mind with numerous exercises from the first and only fully automated and rapid clock drawing test. Stimulates patients on the ability to tell military time (also called “international time”), describe movement, and respond to timepieces. Quickly and Easily. Ideal for military, veteran, and international patients who know 24-hour clocks instead of AM and PM. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages. Useful for occupational therapy and rehabilitation.
Learning Times2Tell™ Student Editions

Now your students can learn how to tell time the easy and computerized way with these Specialty Automated Products! Ideals for schools, universities, clinics, & militaries.

► Learning Times2Tell™
Learning Time with the Automatic Clock Drawing Test™
MODEL SA-01- T2TS -W

Rapidly teach, review, and test individuals on how to tell standard time in a rapid and easy automated format. Students also describe movement and respond to timepieces. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages and audio option.

► Learning Military Times2Tell™
Learning Military Time with the Automatic Clock Drawing Test™
MODEL SA-01- MT2TS -W

Rapidly teach, review, and test individuals on how to tell military time (also called “international time”) in a rapid and easy automated format. Students also describe movement and respond to timepieces. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages and audio option. Now it’s easy to learn and understand 24-hour clocks instead of AM and PM.
SpecialtyAutomated proudly introduces the first and only fully ONLINE and standardized Trail Making Tests.

The Trail Making Test is a traditional neuropsychologic assessment tool that was originally designed by the U.S. Army as part of the Army Individual Test Battery in 1944. Nearly 65 years later, SpecialtyAutomated offers completely standardized, rapid, paperless, and online versions of the Trail Making Test, Trails A, Trails B, and a full line of Trail Making Tests and Systems, to engage speakers of other languages as well as those who are unable to write or hold a writing instrument.

No CD-ROMS, DVDs, or software are needed. Part A and Part B and may be used in conjunction with other tests to form a battery. At SpecialtyAutomated, we offer many batteries for ease and rapidity when comprehensively screening the cognition of numerous subjects.

Only SpecialtyAutomated brings you the fastest and most uniform cognitive tests available. Streamline cognitive testing functions with our line of Trail Making Tests and Batteries.

The American Medical Association recommends the Clock Drawing Test and Trail Making Test B Test for older driver assessment. We now offer both tests completely online as part of our Online Test Solutions™. Importantly, individuals who are unable to write or hold a writing instrument now have a way to actively engage in one of the oldest and most popular neuropsychologic assessment tests, the Trail Making Test. Now the Trail Making Test can all be done online, in real time, at any time, at any computer or laptop.
Online Trail Making A Test
MODEL TBC-MEDI-A-08

A Rapid, Sensitive, & Internet – based Cognitive Impairment, Brain Injury, & Cognitive Decline Screening Test for worldwide cognitive screenings

The Trails A Test, often called the Trail-Making Test, Part A, is a popular test. As an online tool, it is designed to save agencies significant time, labor, and expense to rapidly screen and monitor subjects for cognitive decline, brain injury, or cognitive impairment. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between agencies and clinicians, in real time. This test effectively reduces wait time and costs associated with the use of other cognitive tests and other forms of Trails A Tests. It also offers great potential for cognitive evaluations to aid medical decisions, especially when used in conjunction with other cognitive tests.

Online Trail Making Test B Test
MODEL TBC-MEDI-B-08

A Rapid, Sensitive, & Internet – based Cognitive Impairment, Brain Injury, & Cognitive Decline Screening Test for worldwide cognitive screenings

The Trails B Test, often called the Trail-Making Test, Part B, is a popular test. It is also one of two cognitive tests recommended by the American Medical Association for older driver assessments. As an online tool, it is designed to save agencies significant time, labor, and expense to rapidly screen and monitor subjects for cognitive decline, brain injury, or cognitive impairment. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between agencies and clinicians, in real time. This test effectively reduces wait time and costs associated with the use of other cognitive tests and other forms of Trails B Tests. It also offers great potential for cognitive evaluations to aid medical decisions, especially when used in conjunction with other cognitive tests.
Online Trail Making Test (Trails Part A & Trails Part B)
MODEL TBC-MEDI-AB-08

A Rapid, Sensitive, & Internet – based Cognitive Impairment, Brain Injury, & Cognitive Decline Screening Test for worldwide cognitive screenings

This Trail-Making Test contains two popular tests, Part A and Part B. As an online tool, it is designed to save agencies significant time, labor, and expense to rapidly screen and monitor subjects for cognitive decline, brain injury, or cognitive impairment. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between agencies and clinicians, in real time. This test effectively reduces wait time and costs associated with the use of other cognitive tests and other forms of Trail-Making Tests. It also offers great potential for cognitive evaluations to aid medical decisions, especially when used in conjunction with other cognitive tests.

Online Trail Making Test and Automatic Clock Drawing Test ™
Online Cognitive Screening Test Battery
MODEL ACDT-MEDI-08-AB

A Rapid, Sensitive, Comprehensive, & Internet – based Cognitive Screening Test for improved measures of cognitive impairment and cognitive decline

Each year, millions of clock drawing tests are administered across the world. This is the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests, combined with two of the most popular cognitive tools, Trails A and Trails B Tests. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data worldwide in real time. This powerful battery effectively reduces wait time and costs associated with manual administration, semi-computerization, and use of other cognitive tests. No other visual attention assessment is as sensitive as the Automatic Clock Drawing Test™. Studies show that Automatic Clock Drawing Test™ results correlate with crash risk. Automatic Clock Drawing Tests ™ are powerful weapons in the global challenge against brain injury, cognitive impairment, and dementia. Online Automatic Clock Drawing Tests ™ offer great potential for fitness-to-drive evaluations to reduce crashes. Optional computerized verbal learning and memory tests are available to monitor long-term changes in patients after head injury and to improve the recovery process. This battery includes the Automatic Clock Drawing Test™, Trail Making Test, Part A, and Trail Making Test, Part B.
Online Cognitive Test Battery with Automatic Clock Drawing Test and Trail Making Test, Part A
MODEL ACDT-MEDI-A-08

*Rapid, Sensitive, & Internet – based Cognitive Impairment & Cognitive Decline Screening Tests for worldwide cognitive screenings*

This powerful battery is designed to save agencies significant time, labor, and expense to rapidly screen and monitor subjects for cognitive decline or impairment. All tests are administered online. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between agencies and clinicians, in real time. This battery effectively reduces wait time and costs associated with the use of other cognitive tests. Our cognitive test battery offers great potential for cognitive evaluations to aid medical decisions. These tools, and especially our Automatic Clock Drawing Test™, ensure that subjects of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally.

Automatic Clock Drawing Test and Online Trail Making Test Part B

Online Cognitive Test Battery with Automatic Clock Drawing Test and Trail Making Test, Part B
MODEL ACDT-MEDI-B-08

*A Rapid, Sensitive, & Internet – based Cognitive Impairment & Cognitive Decline Screening Tests for worldwide cognitive screenings*

This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the Trails B Test, another very popular cognitive screening tool. This powerful battery is designed to save agencies significant time, labor, and expense to rapidly screen and monitor subjects for cognitive decline or impairment. All tests are administered online. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between agencies and clinicians, in real time.
Automatic Clock Drawing Test and Online Trail Making Test (A & B)

Cognitive Test Battery with Trail Making Test and Automatic Clock Drawing Test ™
MODEL ACDT-MEDI-AB-08

A Rapid, Sensitive, & Internet – based Cognitive Impairment & Cognitive Decline Screening Tests for screening drivers and many others

This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the Trail Making Test, Part A and Part B. This extra powerful battery is designed to save agencies significant time, labor, and expense to rapidly screen and monitor subjects for cognitive decline or impairment. All tests are administered online. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between agencies and clinicians, in real time. Screens cognitive dysfunction, memory, numerical knowledge, visual perception, visual processing, visual attention, selective and divided attention, time conceptualization, visuospatial skills, and executive skills.

Cognitive Health Test Battery

Online Cognitive Test Battery with Automatic Clock Drawing Test and Trail Making Test, Part B
MODEL ACDT-MEDI-B-08

Each year, millions of clock drawing tests are administered around the world. This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the Trails B Test, another very popular cognitive screening tool. This powerful battery is designed to save agencies significant time, labor, and expense to rapidly screen and monitor subjects for cognitive decline or impairment. All tests are administered online. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between agencies and clinicians, in real time. This battery effectively reduces wait time and costs associated with the use of other cognitive tests. Our cognitive test battery offers great potential for cognitive evaluations to aid medical decisions. These tools, and especially our Automatic Clock Drawing Test ™, ensure that subjects of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally. This battery, which includes Automatic Clock Drawing Test ™ and Trail Making Test, Part B, screens for cognitive dysfunction, memory, numerical knowledge, visual perception, visual processing, visual attention, selective and divided attention, time conceptualization, visuospatial skills, and executive skills.
Comprehensive Cognitive Test Battery with Reaction Time Tests and Automatic Clock Drawing Test
MODEL ACDT-RE-08

Rapid, sensitive, & fully Internet-based tests for research, clinical, and transportation license test applications (including automated driver’s license test applications)

Includes 4 distinct tests:
- Automatic Clock Drawing Test™
- Choice R(x) RE-07™ (to test for choice reaction time)
- Non R(x) RE-07™ (to test for non-reaction time)
- Reaction R(x) RE-07™ (to test for reaction time)

No other cognitive test is as simple, rapid, & sensitive!

Interactive, Multimedia, and Online Driver Assessment
Online Trail Making Test and Automatic Clock Drawing Test™
MODEL ACDT-MEDI-08-AB-DL

A Rapid, Sensitive, & Internet-based Brain Injury, Cognitive Impairment, & Dementia Screening Test for hospitals, clinics, rehabilitation centers, research institutes, and government agencies

Each year, millions of clock drawing tests are administered across the world. This is the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests, combined with two of the most popular cognitive tools, Trails A and Trails B Tests. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data worldwide in real time. This powerful battery effectively assesses drivers, reduces wait time and costs associated with manual administration, semi-computerization, and use of other cognitive tests. No other tests offer such quick and sensitive, autonomous administration. Studies show that Automatic Clock Drawing Test™ results correlate with crash risk. Automatic Clock Drawing Tests™ are powerful weapons in the global challenge against brain injury, cognitive impairment, and dementia. Online Trail Making Tests, when combined with the Automatic Clock Drawing Test™ offer great potential for fitness-to-drive evaluations to reduce crashes and save lives.
Comprehensive Online Cognitive Test Battery with Reaction Time Tests, Trail Making Tests, and Automatic Clock Drawing Test™

MODEL ACDT-RE-08-AB

Includes 6 distinct tests:
- Automatic Clock Drawing Test™
- Trail Making Test, Part A
- Trail Making Test, Part B
- Choice R(x) RE-07™ (to test for choice reaction time)
- Non R(x) RE-07™ (to test for non-reaction time)
- Reaction R(x) RE-07™ (to test for reaction time)

Each year, millions of clock drawing tests are administered worldwide. This battery includes a fully standardized and online Clock Drawing Test. It also includes three online reaction time tests and one of the most popular cognitive tests, the Trail Making Test, Part A and Part B. Our suite of cognitive screening tests are designed to optimize time and management of data collection, processing, and review. The ACDT-RE-08-AB is a high-tech and low-cost tool that rapidly screens and monitors subjects. Instant scores, reports, statistics, and feedback are provided through a unique web-based application that enables simultaneous review and comparison of data across the world in real time. Automatic Clock Drawing Tests™ offer the option for simple and self-service administration to measure cognition in small and very large populations. No other visual attention assessment is as sensitive as the Automatic Clock Drawing Test™. Studies show that Automatic Clock Drawing Test™ results correlate with crash risk. The battery of tests allows researchers to monitor short-term and long-term changes in subjects anywhere through our unique Internet database and systems.

Includes 6 distinct tests:
- Automatic Clock Drawing Test™
- Trail Making Test, Part A
- Trail Making Test, Part B
- Choice R(x) RE-07™ (to test for choice reaction time)
- Non R(x) RE-07™ (to test for non-reaction time)
- Reaction R(x) RE-07™ (to test for reaction time)

No other cognitive test battery is as powerful, rapid, & sensitive! No other cognitive test battery is as powerful, rapid, & sensitive!
Online Memory Loss and Comprehensive Cognitive Test Battery
MODEL ACDT-ML-08

A Rapid, Sensitive, Comprehensive, and Internet-based Memory Screening Test for hospitals, militaries, clinics, and other agencies.

Each year, millions of clock drawing tests are administered worldwide. This battery includes the first and only fully web-based Clock Drawing Test, Trail Making Test Part A, Trail Making Test Part B, Verbal Learning Test SA08™, and Memory Test SA08™. As an online tool, these tests are designed to save significant time and expense to rapidly detect and monitor memory loss that may be caused by cognitive impairment, cognitive decline, brain injury, or brain disease. All tests are administered on the Internet through networked computers and laptops. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world in real time.

Online Comprehensive Cognitive Test Battery for Sports
MODEL ACDT-SM-08-AB

A Rapid, Sensitive, & Internet-based Brain Injury, Cognitive Impairment Screening Test for worldwide selection, training, monitoring, & rehabilitation of athletes

This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and a complete Trail Making Test (Part A and Part B). This powerful battery is designed to save sport teams significant time, labor, and expense to rapidly screen and monitor athletes for brain injury. All tests are administered online through networked computers and laptops. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between teams, coaches, and physicians, in real time.

This battery effectively reduces wait time and costs associated with the use of other cognitive tests. Our cognitive test battery offers great potential for comprehensive fitness-to-play evaluations to reduce injuries, aid medical decisions, and optimize the performance of athletes.
**Driver’s License Cognitive Test Battery**

**MODEL ACDT-DMV-08**

*A Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment, & Dementia Screening Test for Driver’s license test offices and other transport licensing agencies*

Each year, millions of clock drawing tests are administered worldwide. This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the Trails B Test. This powerful battery is designed to save motor vehicle agencies significant time, labor, and expense to rapidly screen and monitor drivers for brain impairment and dementia. All tests are administered online through networked computers and laptops. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world in real time. This test effectively reduces wait time and costs associated with the use of other cognitive tests. Studies show that Clock Drawing Test and Trail B Test results correlate with crash risk. The American Medical Association recommends both cognitive tests to assess older drivers.

**Driver’s License Comprehensive Cognitive Test Battery**

**MODEL ACDT-DMV-08-AB**

*A Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment, & Dementia Screening Test for Driver’s Licenses*

Each year, millions of clock drawing tests are administered worldwide. This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the very popular Trail Making Test, Part A and Part B. This powerful battery is designed to save motor vehicle agencies significant time, labor, and expense to rapidly screen and monitor drivers for brain impairment and dementia. All tests are administered online through networked computers and laptops. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world in real time. This comprehensive battery effectively reduces wait time and costs associated with the use of other cognitive tests. Studies show that Clock Drawing Test and Trail B Test results correlate with crash risk. The American Medical Association recommends both cognitive tests to assess older drivers. Our cognitive test battery offers great potential for fitness-to-drive evaluations to reduce crashes and high-profiled tragedies involving dementia drivers. These tools, and especially our Automatic Clock Drawing Test™, ensure that drivers of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally.
Online Truck Driver’s License Comprehensive Cognitive Test Battery
MODEL ACDT-CDL-08-AB

A Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment, Cognitive Decline, & Dementia Screening Test for Commercial Driver’s License test office and trucking companies

Each year, millions of clock drawing tests are administered around the world. This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the classic Trail Making Test, Part A and Part B. This powerful battery is designed to save commercial driver’s license test agencies significant time, labor, and expense to rapidly screen and monitor drivers for brain impairment and dementia. All tests are administered online. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world in real time. This test significantly reduces wait time and costs associated with the use of other cognitive tests. Studies show that Clock Drawing Test and Trail B Test results correlate with crash risk. The American Medical Association recommends both cognitive tests to assess older drivers. Our comprehensive cognitive test battery offers great potential for fitness-to-drive evaluations to reduce crashes and high-profiled tragedies involving truck drivers. These tools, and especially our Automatic Clock Drawing Test™, ensure that truck drivers of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally.

Online Truck Driver’s License Cognitive Test Battery
MODEL ACDT-CDL-08

A Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment, & Dementia Screening Test for Commercial Driver’s License test office and trucking companies

Each year, millions of clock drawing tests are administered around the world. This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the Trails B Test. This powerful battery is designed to save commercial driver’s license test agencies significant time, labor, and expense to rapidly screen and monitor drivers for brain impairment and dementia. All tests are administered online. Comprehensive Online Cognitive Test Battery for Pilots with Automatic Clock Drawing Test ™ and Online Trail Making Test
MODEL ACDT-P-08-AB

A Rapid, Sensitive, & Internet-based Brain Injury, Cognitive Impairment Screening Test for worldwide selection, training, monitoring, & rehabilitation of pilots

Millions of clock drawing tests are administered around the world. This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the very popular Trail Making Test, Part A and Part B. This battery is designed to save airlines significant time, labor, and expense to rapidly and comprehensively screen and monitor pilots for cognitive decline or impairment. All tests are administered online through networked computers and laptops. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between airlines and physicians, in real time.
Studies estimate that vision accounts for 85 percent to 95 percent of all sensing clues in driving. Low vision often occurs when sight weakens with increasing age.

**SpecialtyAutomated** offers the very best and some of the one and only automated vision screening tests and systems available in the world.

Early detection of eye diseases prevents vision loss and blindness.

Test scores and test cut scores reflect most Sytotechnology™ programs and norms of collision risks of millions of drivers.

All vision tests can be easily programmed to satisfy state or country vision test standards, languages, and requirements.

**SpecialtyAutomated** products provide instant scores, feedback, and statistics for review or to create baseline data.
STATIC VISUAL ACUITY

► Stat-VAS™
Static Visual Acuity Screen
MODEL SA-01-SA-W

This is a serious and simple vision screening test that anyone can easily take and complete. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. No more long lines! Developed in accordance with current International Council of Ophthalmology recommendations.

► Stat-VACS™
Static Visual Acuity Contrast Sensitivity Screen
MODEL SA-01-SV-W

This is a serious and simple vision screening test that anyone can easily take and complete. No more long lines! Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.
No more wall charts! Buy now your self-service vision tests by SpecialtyAutomated.

➤ Tumbling E Stat-VAS™
Tumbling E Static Visual Acuity Screen
MODEL SA-01-TESA-W

You’ll tumble for this serious, simple, and objective vision screening test. Ideal for children over age 3 years and adults with limited reading proficiency. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, companies, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. No more long lines! Fully automated and fast. Developed in accordance with current International Council of Ophthalmology recommendations.

➤ Tumbling E Stat-VACS™
Tumbling E Static Visual Acuity Contrast Sensitivity Screen
MODEL SA-01-TESV-W

You’ll tumble for this serious and simple vision screening test that anyone can easily take and complete. Ideal for children over age 3 years and adults with limited reading proficiency. No more long lines! Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, companies, hospitals, clinics, and doctor’s offices. Fully automated and fast. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.
Stat-VACV™
Static Visual Acuity and Color Vision Screen
MODEL SA-02-SA-W

This is a serious and simple vision screening test that anyone can easily take and complete. No more long lines. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

Tumbling E Stat-VACV™
Tumbling E Static Visual Acuity and Color Vision Screen
MODEL SA-02-TESA-W

You’ll tumble for this serious and simple vision screening test that anyone can easily take and complete. Ideal for children over age 3 years and adults with limited reading proficiency. No more long lines. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, companies, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current International Council of Ophthalmology recommendations.

Online Aviation Static Visual Acuity Test
MODEL SVA-P-08

A Rapid, sensitive, and Internet-based Static Visual Acuity screening test for airline pilots

This is the quickest online static visual acuity (SVA) screening test product for pilots. Instant scores, reports, statistics, and feedback are provided through a unique web-based application that enables simultaneous review and comparison of data across airlines around the world in real time. Contrast sensitivity and SVA, combined, are recommended for a stronger measure of visual acuity. This screening test is a significant improvement over the Snellen Eye Charts of the 1860s and the semi-computerized vision testers of the 20th century. Reduce wait times. Click and connect your office today.
Aviation Vision Skills Test Battery

Aviation Vision Skills Screening Test Battery
MODEL SVS-P-08

A Rapid, sensitive, and Internet-based visual acuity screening test package for worldwide vision training, monitoring, & rehabilitation of pilots

This is the quickest online static visual acuity (SVA) screening test battery. Instant scores, reports, statistics, and feedback are provided through our unique web-based application that enables simultaneous review and comparison of data between airlines and physicians, around the world, in real time. Contrast sensitivity and SVA, combined, are recommended for a stronger measure of visual acuity. Since no standard comprehensive vision tests and renewal periods exist for pilots, this screening test battery is a significant improvement over the Snellen Eye Charts of the 1860s and the vision testers of the 20th century.

Comprehensive Visual Acuity Test for Aviation Vision Screening Test Battery for Pilots
MODEL VT-SVA-P-08

A Rapid, sensitive, and Internet-based vision screening test package for airlines

This visual acuity screening test battery is the fastest online tool to provide instant scores, reports, statistics, and feedback through a unique web-based application that enables simultaneous review and comparison of data between agencies in real time. This online battery comprehensively screens pilots for ambient light and weather conditions, such as contrast sensitivity (“fog vision”), static visual acuity, night static visual acuity, solar glare recovery, night driving glare recovery, weather vision, wind vision, plus stereopsis, sign recognition. An optional color perception test is also available. Improve flying performance now with this vision screening battery.

Driver’s License Static Visual Acuity Test
MODEL SVA-DMV-08

A Rapid, sensitive, and Internet-based Static Visual Acuity Screening Test for Driver’s license offices and other transport agencies

This classic and quick test screens drivers for Static visual acuity and contrast sensitivity (“fog vision”). Integrated distances for far, near, and intermediate acuity (left and right eyes, binocularity) are included. Night static visual acuity screening component is optional.
**Driver’s License Vision Test Battery**
MODEL VT-SVA-DMV-08

A Rapid, sensitive, and Internet-based vision screening test package for Driver’s license offices, hospitals, research institutes, clinics, and other transport agencies

This online battery comprehensively screens for ambient light and weather conditions, such as contrast sensitivity (“fog”), static visual acuity, night static visual acuity, solar glare recovery, night driving glare recovery, weather vision, wind vision, plus stereopsis, and sign recognition. An optional color perception test is also available.

**Military Static Visual Acuity Test**
Online Military Static Visual Acuity Test
MODEL SVA-MIL-08

A Rapid, sensitive, and Internet-based Static Visual Acuity screening test for militaries

This is the quickest online static visual acuity (SVA) screening test product for militaries. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across military bases and other agencies the world in real time. Start screening your soldiers or recruits for Static visual acuity & Contrast sensitivity (“fog vision”), and Night static visual acuity. This test includes integrated distances for far, near, & intermediate acuity (left & right eyes, binocularity).

**Military Vision Skills Test Battery**
Online Military Vision Skills Screening Test Battery
MODEL SYS-MIL-08

A Rapid, sensitive, and Internet-based visual acuity screening test package for militaries and other agencies

Screen soldiers and recruits now for Static visual acuity, Contrast sensitivity (“fog vision”), and Night static visual acuity. Test includes integrated distances for far, near, & intermediate acuity (left & right eyes, binocularity). This is the quickest online static visual acuity (SVA) screening test battery. Instant scores, reports, statistics, and feedback are provided through our unique web-based application that enables simultaneous review and comparison of data between military bases and physicians, around the world, in real time.
Static Visual Acuity Health Test
Online Static Visual Acuity Screening Test
MODEL SVA-MEDI-08

A Rapid, sensitive, and Internet-based visual acuity screening test for hospitals, medical offices, rehabilitation centers, clinical research, & pharmaceutical studies

This is the fastest web-based static visual acuity (SVA) screening test for hospitals, medical offices, rehabilitation centers, clinical research, and pharmaceutical studies. Instant scores, reports, statistics, and feedback are provided through an exclusive unique online application. These effectively reduce patient wait time and equipment costs associated with other vision screening tests. Importantly, this test provides the simultaneous review and comparison of data across agencies in real time. Contrast sensitivity and SVA, combined, are recommended for a stronger measure of visual acuity. This screening test is a significant improvement over the Snellen Eye Charts of the 1860s and the vision testers of the 19th century. Improve visual health by rapidly screening your patients now for Static Visual Acuity and Contrast sensitivity (“fog vision”). This test includes an option for screening for Night visual acuity.

Static Visual Acuity Test for Sports
Online Static Visual Acuity Test for Sports
MODEL SVA-SM-08

A Rapid, sensitive, and Internet-based Static Visual Acuity screening test for worldwide vision training, monitoring, & rehabilitation of athletes

This is the quickest online static visual acuity (SVA) screening test product for athletes. Instant scores, reports, statistics, and feedback are provided through a unique web-based application that enables simultaneous review and comparison of data across teams, coaches, and physicians around the world in real time. Contrast sensitivity and SVA, combined, are recommended for a stronger measure of visual acuity. This screening test is a significant improvement over the Snellen Eye Charts of the 1860s and the semi-computerized vision testers of the 20th century. This test screens athletes for Static visual acuity, Contrast sensitivity (“fog vision”), Night static visual acuity, and Integrated distances for far, near, & intermediate acuity (left & right eyes, binocularity).
Truck Driver Static Visual Acuity Test
Online Truck Driver Static Visual Acuity Test
MODEL SVA-CDL-08

*A Rapid, sensitive, and Internet - based Static Visual Acuity screening test for Commercial Driver’s License test office and trucking companies*

This is the quickest online static visual acuity (SVA) screening test product for truckers. Instant scores, reports, statistics, and feedback are provided through a unique web-based application that enables simultaneous review and comparison of data across agencies around the world in real time. Contrast sensitivity and SVA, combined, are recommended for a stronger measure of visual acuity. This screening test is a significant improvement over the Snellen Eye Charts of the 1860s and the semi-computerized vision testers of the 20th century. It includes screening tests for static visual acuity, contrast sensitivity (“fog vision”), Night static visual acuity, and integrated distances for far, near, & intermediate acuity (left & right eyes, binocularity).

Vision Test Battery for Truck Drivers
Online Truck Driver’s License Vision Screening Test Battery
MODEL VT-SVA-CDL-08

*A Rapid, sensitive, and Internet-based vision screening test package for Commercial Driver’s License test office and trucking companies*

This visual acuity screening test battery is the fastest online tool to provide instant scores, reports, statistics, and feedback through a unique web-based application that enables simultaneous review and comparison of data between agencies in real time. This online battery comprehensively screens truckers for static visual acuity and ambient light and weather conditions, such as contrast sensitivity (“fog”), static visual acuity, night static visual acuity, solar glare recovery, night driving glare recovery, weather vision, wind vision, plus stereopsis, sign recognition. An optional color perception test is also available. Reduce wait time now with this vision screening battery. Start safe driving practices today.
Sports Vision Skills Test Battery
Online Vision Skills Screening Test Battery for Athletes
MODEL SVS-SM-08

A Rapid, sensitive, and Internet-based visual acuity screening test package for worldwide vision training, monitoring, & rehabilitation of athletes

This is the quickest online static visual acuity (SVA) screening test battery. Instant scores, reports, statistics, and feedback are provided through our unique web-based application that enables simultaneous review and comparison of data between sports teams, coaches, and physicians, around the world, in real time. Screen for Static visual acuity, contrast sensitivity (“fog vision”), Night visual acuity, Stereopsis, sign recognition, weather vision, solar glare recovery, and night glare recovery. Color perception screening tests are optional. Improve sport team member selection and optimize athletic performance now.

Static Vision Skills Health Battery
Online Static Visual Acuity Screening Test
MODEL SVA-MEDI-08

A Rapid, sensitive, and Internet-based visual acuity screening test for hospitals, medical offices, rehabilitation centers, clinical research, & pharmaceutical studies

This is the fastest web-based static visual acuity (SVA) screening test for hospitals, medical offices, rehabilitation centers, clinical research, and pharmaceutical studies. Instant scores, reports, statistics, and feedback are provided through an exclusive unique online application. These effectively reduce patient wait time and equipment costs associated with other vision screening tests. Importantly, this test provides the simultaneous review and comparison of data across agencies in real time. Contrast sensitivity and SVA, combined, are recommended for a stronger measure of visual acuity. This screening test is a significant improvement over the Snellen Eye Charts of the 1860s and the vision testers of the 20th century. Click and connect your office today. This test screens Static Visual Acuity, Contrast sensitivity (“fog vision”), and Night visual acuity option.
DYNAMIC VISUAL ACUITY.

Not everything in life is static.

Studies show that dynamic visual acuity is not only a more informative measure of the ability to discern detail, but also an essential component of daily activities. It is particularly powerful in driving, flying, sailing, and engaging in sports. Dynamic visual acuity allows for objective measures that can assist in team member selection since all athletes require superior visual skills. The National Academy of Sciences recognizes “….that dynamic visual acuity if often more predictive of real-world task performance than are static acuity measures of vision”. DYNAMIC VISUAL ACUITY. Available nowhere except SpecialtyAutomated.
DYNAMIC VISUAL ACUITY

► Dyna-VAS™
Dynamic Visual Acuity Screen
MODEL SA-01-DVA-W

Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. No more long lines! Developed in accordance with current International Council of Ophthalmology recommendations.

► Dyna-VACS™
Dynamic Visual Acuity Contrast Sensitivity Screen
MODEL SA-01-DV-W

This is a serious and simple vision screening test that anyone can easily take and complete. No more long lines. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Rapidly tests dynamic visual acuity and static visual acuity. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

► DynaVAC2S™
Dynamic Visual Acuity and Color Contrast Sensitivity Screen
MODEL SA-02-DV-W

Just what the doctor ordered. This is a simple vision screening test that anyone can easily take and complete. Screens for contrast elements and color vision. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Rapidly tests dynamic visual acuity, static visual acuity, and color contrast sensitivity. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

“These Dynamic Visual Acuity Tests are simply the best available. Add fog vision, night glare, and solar glare for serious and comprehensive testing and evaluating of drivers and others.”
Dyna-VACS NV ™
Dynamic Visual Acuity, Night Vision, and Color Contrast Sensitivity Screen
MODEL SA-03- DV-W

Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Tests dynamic visual acuity and color contrast sensitivity, plus night screen vision. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

Dyna-VACNV ™
Dynamic Visual Acuity, Color Vision, and Night Vision Screen
MODEL SA-04- DVA-W

Easy to use. No more long lines. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

Dyna-VANV ™
Dynamic Visual Acuity and Night Vision Screen
MODEL SA-03-DVA-W

This is a serious and simple vision screening test that anyone can easily take and complete. No more long lines. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.
Dyna-VACV™
Dynamic Visual Acuity and Color Vision Screen
MODEL SA-02-DVA-W

This is a serious and simple vision screening test that anyone can easily take and complete. No more long lines. Ideal for driver's license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor's offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

Driver's License Dynamic Visual Acuity Test
Online Driver's License Dynamic Visual Acuity Test
MODEL DVA-DMV-08

A Rapid, sensitive, and Internet-based Dynamic Visual Acuity screening test for Driver's license offices and other transport agencies

Safe driving practices start with comprehensive screening of drivers. This test screens for Dynamic Visual Acuity, Contrast sensitivity ("fog vision"), Integrated distances for far, near, & intermediate acuity (left & right eyes, binocularity). Night dynamic visual acuity is optional.

Online Driver's License Dynamic Visual Acuity Test Battery
MODEL VT-DVA-DMV-08

A Rapid, sensitive, and computerized dynamic visual acuity screening test package for Driver's license offices, clinics, hospitals, and other transport agencies

This battery screens for Dynamic visual acuity, Contrast sensitivity, Night dynamic visual acuity, Stereopsis, Sign recognition, Dynamic solar glare recovery, night driving glare recovery, Dynamic weather vision, wind vision, and optional color perception.
Online Medical **Dynamic Visual Acuity Health Test**  
**MODEL DVA-MEDI-08**

*A Rapid, sensitive, and Internet-based Dynamic Visual Acuity screening test for hospitals, clinics, rehabilitation centers, and government agencies by SpecialtyAutomated™*

This is a vision health test every doctor needs. It includes the screening of Dynamic Visual Acuity and Contrast sensitivity. There are integrated distances for far, near, and intermediate acuity (left and right eyes, binocularity). Night dynamic visual acuity is optional.

---

**Dynamic Visual Acuity Test for Sports**  
**Online Dynamic visual Acuity Test for Athletes**  
**MODEL DVA-SM-08**

*A Rapid, sensitive, and Internet-based Dynamic Visual Acuity screening test for worldwide Dynamic Visual Acuity training, monitoring, and rehabilitation of athletes*

Studies show that Dynamic Visual Acuity improves athletic performance. Such measures are also useful for team member selection. This test screens for Dynamic Visual Acuity and Contrast Sensitivity. There are integrated distances for far, near, and intermediate acuity (left and right eyes, binocularity). Night dynamic visual acuity is optional.

---

**Online Dynamic Visual Acuity Test for Pilots**  
**MODEL DVA-P-08**

*A Rapid, sensitive, and Internet-based Dynamic Visual Acuity screening test for worldwide aviation applications*

Screen and monitor the vision of pilots with this useful test. This test screens for Dynamic Visual Acuity and Contrast Sensitivity, a perfect combination and measure of real-world activities. Includes integrated distances for far, near, and intermediate acuity (left and right eyes, binocularity). Night dynamic visual acuity is optional.
Military Dynamic Visual Acuity Test
MODEL DVA-MIL-08

A Rapid, sensitive, and Internet-based Dynamic Visual Acuity screening test for militaries and other agencies

This test is a must-have for militaries. It screens the Dynamic Visual Acuity, Contrast Sensitivity (“fog vision”), and Night dynamic visual acuity of soldiers and recruits. Integrated distances for far, near, and intermediate acuity (left and right eyes, binocularity) are included.

Truck Driver Dynamic Visual Acuity Test
Online Truck Driver’s License Dynamic Visual Acuity Test
MODEL DVA-CDL-08

A Rapid, sensitive, and Internet-based Dynamic Visual Acuity screening test for Commercial Driver’s License Test offices and trucking companies

This is the first and only rapid and fully web-based Dynamic Visual Acuity Screening Test to provide instant scores, reports, statistics, and feedback through a unique application that enables simultaneous review and comparison of data between agencies in real time. Improve truck driver safety by screening truckers for Dynamic Visual Acuity, Contrast sensitivity (“fog vision”), and integrated distances for far, near, and intermediate acuity (left and right eyes, binocularity). Night dynamic visual acuity screening is optional.
DYNASTAT™. Do you want the best of both worlds? The perfect combination for screening vision, among other measures, involves DYNAMIC VISUAL ACUITY and STATIC VISUAL ACUITY.

SpecialtyAutomated proudly introduces the DYNASTAT™ Series of vision screening tests to account for viewing stationary and moving objects. Patients love it. DYNASTAT™ is exclusively available at SpecialtyAutomated.
DynaStat VAS™
Dynamic and Static Visual Acuity Screen.
MODEL SA-01-DS-W

A simple, swift, and practical vision screening test. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Rapidly tests dynamic visual acuity and static visual acuity. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

DynaStat VACS™
Dynamic and Static Visual Acuity Contrast Sensitivity Screen
MODEL SA-01-DSC-W

A simple, swift, and practical vision screening test. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Rapidly tests dynamic visual acuity and static visual acuity. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

DynaStat VACV™
Dynamic and Static Visual Acuity and Color Vision Screen
MODEL SA-02-DS-W

A simple, swift, and practical vision screening test. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Rapidly tests dynamic visual acuity, static visual acuity, and color vision. All-new touch screen technology powered by Sytotechnology™. The only screening test developed in accordance with current International Council of Ophthalmology recommendations.
DynaStat– VANV™
Dynamic and Static Visual Acuity and Night Vision Screen
MODEL SA-02-DS-W

The simplest, swiftest, and most practical vision screening test ever. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Rapid. All-new touch screen technology powered by Sytotechnology™.

Developed in accordance with current International Council of Ophthalmology recommendations.

Comprehensive Visual Acuity Health Test
Online Comprehensive Visual Acuity Screening Test Battery
MODEL VA-MEDI-08

A Rapid, sensitive, and Internet-based visual acuity screening test package for hospitals, clinics, rehabilitation centers, clinical research, and governments

This battery combines the best of both visual acuity worlds. It includes the first fully web-based static visual acuity and dynamic visual acuity comprehensive vision screening test package. Instant scores, reports, statistics, and feedback are provided through an exclusive unique online application. These effectively reduce patient wait time and equipment costs associated with other vision screening tests. Screen patients for Dynamic visual acuity, static visual acuity, Sign recognition, Dynamic solar glare recovery, night glare recovery, Dynamic weather vision, wind vision, contrast sensitivity (“fog vision”), Night dynamic visual acuity, and Stereopsis. A color perception test is optional. Expect powerful measures of visual acuity. Click and connect your office today.

Comprehensive Visual Acuity Test for Drivers
Online Comprehensive Visual Acuity Screening Test Battery
MODEL VA-DMV-08

A Rapid, sensitive, and Internet-based visual acuity screening test package for driver’s license test offices and other government transport agencies

This battery combines the best of both visual acuity worlds. It includes the first fully web-based static visual acuity and dynamic visual acuity comprehensive vision screening test package. Instant scores, reports, statistics, and feedback are provided through an exclusive unique online application. These effectively reduce wait time and equipment costs associated with other vision screening tests. This battery screens for contrast sensitivity (“fog vision”), Night dynamic visual acuity, Stereopsis, Optional color perception, Dynamic visual acuity and static visual acuity, Sign recognition, Dynamic solar glare recovery and night glare recovery, and Dynamic weather vision and wind vision. No other test on the market offers such rapidity and strength.
Comprehensive Visual Acuity Screening Test Battery for Sports
MODEL VA-SM-08

A Rapid, sensitive, and Internet-based visual acuity screening test battery and eye training package for sports

All athletes require superior vision skills to successfully compete. This battery combines the best of both visual acuity worlds. It includes the first fully web-based static visual acuity and dynamic visual acuity vision screening test package. Instant scores, reports, statistics, and feedback are provided through an exclusive unique online application. These effectively reduce patient wait time and equipment costs associated with other vision screening tests. This battery includes all of the features required to enhance athletic performance. These include dynamic visual acuity and static visual acuity, Sign recognition, Dynamic weather vision and wind vision, Contrast sensitivity (“fog vision”), Night dynamic visual acuity, Stereopsis, Optional color perception, Dynamic solar glare recovery and night glare recovery.

Comprehensive Visual Acuity Test for Truck Drivers
MODEL VA-CDL-08

A Rapid, sensitive, and Internet-based visual acuity screening test package for commercial driver license (CDL) agencies and trucking industries

This battery highlights the importance of safe truck driver practices. It screens Contrast sensitivity (“fog vision”), Night dynamic visual acuity, Stereopsis, and offers Optional color perception. It also screens for Dynamic visual acuity and static visual acuity, Sign recognition, Dynamic solar glare recovery and night glare recovery, and Dynamic weather vision and wind vision.

DynaStat- VACNV™
MODEL SA-04-DS-W

The simplest, swiftest, and most practical vision screening test ever. Everything else seems obsolete. Ideal for driver’s license test bureaus, schools, militarys, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Tests dynamic visual acuity, static visual acuity, color vision, and night screen vision. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.
DynaStat VAC2S™
Dynamic and Static Visual Acuity and Color Contrast Sensitivity Screen
MODEL SA-02-DSC-W

Fun, fun, fun, fun. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Rapidly tests dynamic visual acuity, static visual acuity, and color contrast sensitivity. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

DynaStat- VACSNV™
Dynamic and Static Visual Acuity, Night Vision, and Color Contrast Sensitivity Screen
MODEL SA-03-DSC-W

A serious, simple, and objective vision screening test for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, companies, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Tests dynamic visual acuity, static visual acuity, and color contrast sensitivity, plus night screen vision. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

DynaStat- VANV™
Dynamic and Static Visual Acuity Contrast Sensitivity and Night Vision Screen
MODEL SA-04-DSC-W

Screen for vision at nights now! Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. Tests dynamic visual acuity, static visual acuity, and color contrast sensitivity, plus night screen vision. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.
DynaStat Tumbling E™ Series.

Only SpecialtyAutomated offers the very largest selection of “Tumbling E” screening tests. These tests are suitable for those with limited reading proficiency. Children (age 4 years and over) and adults can benefit from the DynaStat Tumbling E™ Series since both STATIC VISUAL ACUITY and DYNAMIC VISUAL ACUITY are seamlessly screened.

Exclusively available at SpecialtyAutomated.

DynaStat Tumbling E VAC2S ™
Static Tumbling E and Dynamic Visual Acuity and Color Contrast Sensitivity Screen.
MODEL SA-02-DSTEC-W

You'll tumble for this serious, simple, and objective vision screening test. Ideal for children over age 3 years and adults with limited reading proficiency. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, companies, hospitals, clinics, and doctor's offices. Automatic scoring and feedback. Rapidly tests dynamic visual acuity, static visual acuity, and color contrast sensitivity. All-new touch screen technology option powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.
The Centers for Disease Control report that 60% of all children under age 6 years have never had an eye examination. Only 20% of all children have had their vision tested by an eye doctor within the past year.

According to the American Optometric Association, 1 in 4 children have vision problems.

ONLINE vision screening tests by SpecialtyAutomated allow for the rapid, low-cost, and objective screening of numerous children that may otherwise not have access to any vision testing.

SpecialtyAutomated proudly offers its distinct selection of automated vision screening tests for children through its Pediatric Vision Screening Series.
PEDIATRIC VISION SCREENING TESTS

► Pediatric Tumbling E Stat-VAS ™
Pediatric Tumbling E Static Visual Acuity Screen
MODEL SA-01-TESA-Wp

This test is ideal for children age 3 years and older. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. No more long lines! Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.

► Pediatric Landolt-C Optotype Stat-VAS ™
Pediatric Landolt-C Optotype Static Visual Acuity Screen
MODEL SA-01-LOSA-Wp

This test presents the Landolt-C to children age 3 years and older. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.

► Pediatric Shape Optotype Stat-VAS ™
Pediatric Shape Optotype Static Visual Acuity Screen
MODEL SA-01-SOSA-Wp

This test presents different shapes to children age 3 years and older. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.
Pediatric Fun Face Optotype Stat-VAS ™
Pediatric Fun Face Optotype Static Visual Acuity Screen
MODEL SA-01-FOSA-Wp

This test presents different fun faces to screen children age 3 years and older for visual acuity. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.

Pediatric Tumbling E Stat-VACS ™
Pediatric Tumbling E Static Visual Acuity Contrast Sensitivity Screen
MODEL SA-02-TESA-Wp

This test is ideal for contrast sensitivity and visual acuity screening of children age 3 years and older. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.

Pediatric Landolt-C Optotype Stat-VACS ™
Pediatric Landolt-C Optotype Static Visual Acuity Contrast Sensitivity Screen
MODEL SA-02-LOSA-Wp

This test screens children age 3 years and older for visual acuity and contrast sensitivity using the Landolt-C. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.
Pediatric Shape Optotype Stat-VACS™
Pediatric Shape Optotype Static Visual Acuity Contrast Sensitivity Screen
MODEL SA-02-SOSA-Wp

This test presents different shapes to children age 3 years and older to screen for visual acuity and contrast sensitivity. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.

Pediatric Fun Face Optotype Stat-VACS™
Pediatric Fun Face Optotype Static Visual Acuity Screen
MODEL SA-02-FOSA-Wp

This test presents different fun faces to children age 3 years and older to screen for visual acuity and contrast sensitivity. Automatic scoring and feedback. Sytotechnology™. Touch screen Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.

Pediatric DynaStat Tumbling E VAS™
Pediatric Static Tumbling E and Dynamic Visual Acuity Screen
MODEL SA-03-DSTEP-W

Children will tumble for this test that rapidly screens dynamic visual acuity and Tumbling E static visual acuity. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

Pediatric DynaStat Landolt-C Optotype VAS™
Pediatric Static Landolt-C Optotype and Dynamic Visual Acuity Screen
MODEL SA-03-LOSA-Wp

This test screens children age 3 years and older for static and dynamic visual acuity. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.
Pediatric DynaStat Shape Optotype VAS ™
Pediatric Static Shape Optotype and Dynamic Visual Acuity Screen
MODEL SA-03-SOSA-Wp

This test presents different shapes to children age 3 years and older to screen for static and dynamic visual acuity. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.

Pediatric DynaStat Fun Face Optotype
Pediatric Static Fun Face Optotype and Dynamic Visual Acuity Screen
Stat-VAS ™
MODEL SA-03-FOSA-Wp

This test presents different fun faces to children age 3 years and older to screen for static visual acuity and dynamic visual acuity. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.

Pediatric DynaStat Tumbling E VACS ™
Pediatric Static Tumbling E and Dynamic Visual Acuity Contrast Sensitivity Screen
MODEL SA-04-DSTEP-W

Children will tumble for this test that screens dynamic visual acuity and Tumbling E static visual acuity and contrast sensitivity. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.
Pediatric DynaStat Landolt-C Optotype VACS™
Pediatric Static Landolt-C and Dynamic Visual Acuity Contrast Sensitivity Screen

This test screens children age 3 years and older for static and dynamic visual acuity and contrast sensitivity. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Developed in accordance with current American Academy of Pediatrics recommendations.

Pediatric DynaStat Shape Optotype VACS™
Pediatric Static Shape and Dynamic Visual Acuity Contrast Sensitivity Screen
MODEL SA-04-SOSA-Wp

This test presents different shapes to children age 3 years and older to screen for static and dynamic visual acuity and contrast sensitivity. Developed in accordance with current American Academy of Pediatrics recommendations.

Pediatric DynaStat Fun Face Optotype VACS™
Pediatric Static Fun Face and Dynamic Visual Acuity Contrast Sensitivity Screen
MODEL SA-04-FOSA-Wp

This test presents different fun faces to children age 3 years and older to screen for static visual acuity and dynamic visual acuity and contrast sensitivity. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated, online, and fast.
Specialty Automated offers the best vision screening tests and systems. As part of its visual acuity options, color contrast sensitivity screening mechanisms are now available. Color contrast sensitivity is used to evaluate color vision deficits. Some studies demonstrate that it may also be used to assess the progression of age-related maculopathy, abnormal conditions of the macula.

Contrast sensitivity is also commonly known as “fog vision”.
These tests are just what the doctor ordered. Imagine simple vision screening tests that anyone can easily take and complete. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

► Stat-VAC2S™
Static Visual Acuity and Color Contrast Sensitivity Screen
MODEL SA-02-SV-W

Screens for contrast elements and color vision. Rapidly tests static visual acuity and color contrast sensitivity.

► Tumbling E Stat-VAC2S™
Tumbling E Static Visual Acuity and Color Contrast Sensitivity Screen
MODEL SA-02-TESV-W

Ideal for children over age 3 years and adults with limited reading proficiency. Also ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, companies, hospitals, clinics, and doctor’s offices. Rapidly tests static visual acuity and color contrast sensitivity.

► Stat-VACSNV™
MODEL SA-03-SV-W

Tests static visual acuity and color contrast sensitivity, plus night screen vision.

► Tumbling E Stat-VACSNV™
Tumbling E Static Visual Acuity, Night Vision, and Color Contrast Sensitivity Screen
MODEL SA-03-TESV-W

Ideal for children over age 3 years and adults with limited reading proficiency. Tests static visual acuity and color contrast sensitivity, plus night screen vision.
Night operations. Covert missions. These are vital parts of military operations and daily activities. Night vision is also a critical part of driving. At night, a driver’s ability to discern details and readily avoid hazardous situations is limited. Studies show that older drivers are especially at risk. According to National Highway Traffic Safety Administration data, more collisions occur at night than during the day. Specialty Automated offers fully automated and fast night vision screening tests designed to promote safety in all areas of transport.
► Stat-VANV ™
Static Visual Acuity and Night Vision Screen
MODEL SA-03-SA-W

Amaze everyone. This is a serious and simple vision screening test that anyone can easily take and complete. No more long lines. Ideal for driver’s license test bureaus, schools, militaries, airlines, rail bureaus, hospitals, clinics, and doctor’s offices. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Developed in accordance with current International Council of Ophthalmology recommendations.

► Stat-VACNV ™

This screening test, commonly known as the written test or “the rules of the road”, may include any one or combination of features that govern safety, laws, and identification. All knowledge tests can be easily programmed to satisfy state or country test standards, languages, and requirements. Questions, in a multi-media format, cover knowledge and skills needed to safely operate a motor vehicle, commercial vehicle, motorcycle, moped, and boat, among other motorized vehicles). An audio option is available for those with limited reading proficiency.

The SpecialtyAutomated knowledge tests are the very best available. Where multiple tests are required, our systems will automatically advance to the next test in the queue. Order your SpecialtyAutomated tests and systems today.
► Driver’s Traffic Sign Knowledge Test
MODEL DMV-DKT-08

This is a Rapid, Sensitive, and Internet-based Driving Skills Screening Test for hospitals, clinics, rehabilitation centers, clinical research, and motor vehicle agencies. This is the first and only online package of standardized Driving Skills Test designed to save driver’s license departments significant time and expense to rapidly screen driving knowledge skills. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world in real time. This online test is developed from analyses of millions of road collisions, the driving behaviors of millions of drivers, and a traffic safety expert who advises governments on the installation of traffic control devices and procedures. The DMV-DKT-08 effectively reduces wait time and costs associated other driving skills tests. Test questions may be provided by driver’s license personnel or those selected by the Sytotechnology™ statistical sampler or any preferred database. Restricted access to a central database is available to authorized users. Tests can be easily customized for driver’s license agency needs and requirements. Option available to include Automated Commercial Driver’s License Knowledge Tests.

► Automobile Knowledge Test™
MODEL SA-01-KST-AMK-W

This fast and fully automated knowledge screening test can be rapidly used to screen new and existing automobile drivers. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages and can be customized for your state or country.

Screening may include but not be limited to the following: Rules of the road, safe driving practices, courtesy, intersections and turns, merging, passing, parking methods, alcohol and drugs, driving conditions, collision avoidance, traffic lanes, weather and surface hazards, emergency responses, and loss of license. Moped Knowledge Test ™
MODEL SA-01-MST-PTT-W
These motorized bicycles may vary in definition according to U.S. state. However, they usually operate at a maximum speed of no more than 25 mph. Mopeds are neither bicycles nor motorcycles. Yet, the jump in gas prices has led to a rise in moped ownership and ridership. This fast and fully automated knowledge screening test can be rapidly used to screen new and existing moped riders. Ready now for deployment. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages and can be customized for your state or country.

Screening may include but not be limited to the following: Moped control, safety, hazards, clothing, equipment, driving, weather conditions, night driving, effects of alcohol and drugs.
**Moped Trainer Test™**
**MODEL SA-01-KST-PTT-W**

This is an ideal tool to train moped riders on the safe practices of moped riding. As the price of gas increases, so does the number of moped riders. This fast and fully automated knowledge trainer test can be rapidly used to train new and existing motorcycle drivers. Ready now for deployment. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages and can be customized for your state or country.

A large database of questions may include but not be limited to the following: Moped control, safety, hazards, clothing, equipment, driving, weather conditions, night driving, effects of alcohol and drugs.

**Motorcycle Knowledge Test™**
**MODEL SA-01-KST-MTK-W**

The jump in gas prices has led to a rise in motorcycle ridership. This fast and fully automated knowledge screening test can be rapidly used to screen new and existing motorcycle drivers. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages and can be customized for your state or country.

Screening may include but not be limited to the following: Safe motorcycle riding practices, crash avoidance, ride preparation, motorcycle controls knowledge and checks, appropriate gear to wear, fundamental motorcycle control, lane positions and rider safety, intersection safety, conspicuity through clothing, lights, and equipment, safety on dangerous surfaces, mechanical problems and solutions, passenger transportation, effects of alcohol and drugs.
Motorcycle Knowledge Trainer ™ Test
SA-01-KST-MKT-W

This is an ideal tool to train motorcyclists on the safe practices of motorcycle riding. As the price of gas increases, so does the number of motorcycle riders. This fast and fully automated knowledge trainer test can be rapidly used to train new and existing motorcycle drivers. Automatic scoring and feedback. Powered by Sytotechnology™. Available in different languages and can be customized for your state or country.

A large database of questions may include but not be limited to the following: Safe motorcycle riding practices, crash avoidance, ride preparation, motorcycle controls knowledge and checks, appropriate gear to wear, fundamental motorcycle control, lane positions and rider safety, intersection safety, conspicuity through clothing, lights, and equipment, safety on dangerous surfaces, mechanical problems and solutions, passenger transportation, effects of alcohol and drugs.

School Bus Driver Knowledge Test ™
MODEL SA-01-KST-SBK-W

This fully and fast automated knowledge screening test can be rapidly used to screen new and existing school bus drivers. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages and can be customized for your state or country.

Screening may include but not be limited to the following: driving safety, emergency exit and evacuation, antilock braking systems, special safety situation, student management, state and federal laws and regulations for traversing railroad-highway grade crossings, loading and unloading children, danger zones, use of mirrors, safe operation of warning signs, signals, and safety devices.

This bus driver knowledge screening test is designed in accordance with new CDL Requirements, the “S” Endorsement through the Federal Motor Carrier Safety Improvement Act.
School Bus Driver Knowledge Trainer™ Test
MODEL SA-01-KST-SBT-W

This is an ideal tool to train bus drivers on the safe practices of driving. This fast and fully automated knowledge trainer test can be rapidly used to train new and existing bus drivers. Ready now for deployment. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages and can be customized for your state or country.

A large database of questions to prepare for the School Bus Driver Knowledge Test™.

This bus driver knowledge screening test is designed in accordance with new CDL Requirements, the “S” Endorsement through the Federal Motor Carrier Safety Improvement Act.

Snowmobile Knowledge Test™
MODEL SA-01-KST-SMK-W

This fully and fast automated knowledge screening test can be rapidly used to screen new and existing snowmobile drivers. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages and can be customized for your state or country.

Screening may include but not be limited to the following: snowmobile use, courtesy, riding safety, snowmobile maintenance and equipment, clothing, riding tips and methods, signs and signals, etc.

Snowmobile Knowledge Trainer™ Test
MODEL SA-01-KST-SMT-W

This is an ideal tool to train snowmobile driver on the safe practices of driving. This fast and fully automated knowledge trainer test can be rapidly used to train new and existing bus drivers. Ready now for deployment. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Available in different languages and can be customized for your state or country.

A large database of questions may include but not be limited to the following: snowmobile use, courtesy, riding safety, snowmobile maintenance and equipment, clothing, riding tips and methods, signs and signals, etc.
Road signs are an integral part of driving in any country.

Automated road sign identification and recognition screening tests are an integral part of the driving experience. Of equal importance, these tests complement the rehabilitation and recovery process of patients. Recent studies also show that road sign recognition tests can identify senior drivers who recently had a motor vehicle crash.

SpecialtyAutomated offers the largest selection of road sign recognition tests, traffic signal identification tests, and sign knowledge tests. Our road sign tests are available for all U.S. states, international, and multilingual clients.

Off-the-shelf interactive products and customized tests are available in one and several languages.
“The road sign recognition tests by SpecialtyAutomated are the most comprehensive tests available.”

► SAS RSK07 Road Sign Cognition ™ Test
MODEL SA-01-RSR -07 -W

Road sign tests were never this practical. Automatic scoring and feedback. Rapid testing. Ready now for deployment. May include images of actual road signs according to the configuration of your state or country. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast.

► Regal Road Sign Cognition ™ Test
MODEL SA-01-RSR -08 -W

Road sign tests were never this practical. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Questions and scores based on millions of collisions.
At SpecialtyAutomated, we understand that stop signs are available in many languages.

All road sign recognition screening tests and signal identification tests can be easily programmed to satisfy state or country test standards, languages, and requirements.

SpecialtyAutomated products provide instant feedback about whether an answer is correct or not. Where multiple tests are required, our systems will automatically advance to the next test in the queue.

Most tests cover standard shapes, regulatory signs, warning signs, and guide signs.

An audio option is available for those with limited reading proficiency. Think ideal assistive technology. Only at SpecialtyAutomated.
Regal Road Sign Recognition™ Test
MODEL SA-01-RST -08 -W

Road sign tests were never this quick and comprehensive. Automatic scoring and feedback. Fast and comprehensive testing. All-new touch screen technology powered by Sytotechnology™. Fully automated. Questions and scores based on method and driver behavior of millions of collisions.

SAS rk07e Road Sign Recognition™ Test
MODEL SA-02-RST -07 -W

Recognize road signs now through real images and scenarios involving sign cognition, response, and identification. Automatic scoring and feedback. May include images of actual road signs according to the configuration of your state or country. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast.
SAS rk07e Road Sign Cognition™ Trainer
MODEL SA-03-RSC -07 –W

Learn road signs now through a huge database of real images and scenarios involving sign cognition, response, and identification. Automatic scoring and feedback. May include multimedia images of actual road signs according to the configuration of your state or country. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast.

This is an ideal tool to train drivers or use in the rehabilitation and recovery of patients. Available in different languages and can be customized for your state or country.

Regal Road Sign Cognition™ Trainer Test
MODEL SA-01-RSC -08 -W

A huge database of real images and scenarios involving sign cognition, response, and identification constitute this trainer test. Automatic scoring and feedback. May include multimedia images of actual road signs according to the configuration of your state or country. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Most questions and scores based on millions of collisions.

This is an ideal tool to train drivers or use in the rehabilitation and recovery of patients. Available in different languages and can be customized for your state or country.
Traffic lights, stop lights, and traffic signals are signalling devices situated at pedestrian crossings, road intersections, or other locations in order to signal when it is safe to drive, ride, or walk. A universal color code is typically used to regulate the direction and control the flow of traffic.

SpecialtyAutomated is pleased to present its line of traffic signal identification tests. These screening tools provide instant feedback about whether an answer is correct or not.

An audio option is available for those with limited reading proficiency. Think ideal assistive technology. Only at SpecialtyAutomated.
Traffic Signal Cognition ™ Test
MODEL SA-01-TSC-W

Traffic signal tests were never this fast and fun. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and customizable for your state or country.

Regal Traffic Signal Cognition ™ Test
MODEL SA-01-RTS -08 -W

Traffic signal tests were never this practical. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Some questions and scores based on millions of collisions.
Regal Traffic Signal Recognition ™ Test
MODEL SA-01-RTS –08R -W

Traffic signal tests were never this quick and comprehensive. Automatic scoring and feedback. Fast and comprehensive testing. All-new touch screen technology powered by Sytotechnology™. Fully automated. Some questions and scores based on method and driver behavior of millions of collisions.

SAS Traffic Signal Recognition ™ Test
MODEL SA-02-TSR -07 -W

Recognize traffic signals now through real images and scenarios involving traffic signal cognition, response, and identification. Automatic scoring and feedback. May include multimedia images of actual traffic signals according to the configuration of your state or country. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast.

SAS rk07a Traffic Signal Cognition ™ Trainer
MODEL SA-03-TSC-07 –W

Learn traffic signals now through a huge database of real images and scenarios involving traffic signal cognition, response, and identification. Automatic scoring and feedback. May include multimedia images of actual road signs. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast.

This is an ideal tool to train drivers or use in the rehabilitation and recovery of patients. Available in different languages and can be customized for your state or country.

Regal Traffic Signal Cognition ™ Trainer Test
MODEL SA-01-RTS –08T –W

A huge database of real images and scenarios involving traffic signal cognition, response, and identification constitute this trainer test. Automatic scoring and feedback. May include multimedia images of actual traffic signals according to the configuration of your state or country. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. Some questions and scores based on millions of collisions.

MODEL TS-08-CTT-W

This is an ideal tool to train drivers or use in the rehabilitation and recovery of patients. Available in different languages.
Pavement markings are an essential part of highway and road safety. They usually complement and are more visible than road signs and traffic signals. They direct drivers through traffic. They warn of approaching conditions or locations. Pavement markings also help to correctly position vehicles through a uniform system of colors, patterns, widths, symbols, and words.

It is useful to train and to screen drivers on their knowledge of pavement markings and conditions. **SpecialtyAutomated** uniquely provides a line of automated pavement marking screening tests in multimedia format. These screen drivers on safety, recognition, and behavioral response to pavement markings.

**SpecialtyAutomated** products provide instant feedback about whether an answer is correct or not. Where multiple tests are required, our systems will automatically advance to the next test in the queue.

An audio option is available for those with limited reading proficiency.
Pavement Markings Cognition™ Test
MODEL SA-01-PMC-W

Where else can you find a test strictly dedicated to pavement markings? Fast and fun. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and customizable for your state or country.

Regal Pavement Markings Cognition™ Test
MODEL SA-01-PM-08-W
Pavement Markings tests were never this useful. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast.

Regal Pavement Markings Recognition™ Test
MODEL SA-01-RPM-08R-W
This pavement markings test is quick and comprehensive. Incorporates multimedia and various markings for recognition. Screens drivers on their ability to recognize and respond to pavement markings under various conditions, in and out of traffic. Based on U.S. federal and state standards. Can be modified for other languages and countries. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated.
SAS Pavement Markings Recognition™ Test
MODEL SA-02-TPM -07 -W

Recognize pavement markings now through real images and scenarios involving pavement marking cognition, response, and identification. Automatic scoring and feedback. May include multimedia images of actual traffic signals according to the configuration of your state or country. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast.

SAS pk07a Pavement Markings Cognition™ Trainer
MODEL SA-03-TPC-07 -W

Learn pavement markings now through a huge database of real images and scenarios involving pavement marking cognition, response, and identification. Automatic scoring and feedback. May include multimedia images of actual pavement markings. Trains drivers on how to improve their knowledge of different definitions, situations, and responses in and out of traffic. Based on U.S. and federal standards. Can be modified for other languages and countries. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. This is an ideal tool to also use in the rehabilitation and recovery of patients. Available in different languages and can be customized for your state or country.

Regal Pavement Markings Cognition™ Trainer Test
MODEL SA-01-RTS – 08T -W

A huge database of real images and scenarios involving pavement marking cognition, response, and identification constitute this trainer test. Automatic scoring and feedback. May include multimedia images of actual pavement markings according to the configuration of your state or country. All-new touch screen technology powered by Sytotechnology™. This is an ideal tool to train drivers or use in the rehabilitation and recovery of patients. Available in different languages.
Now you can experience all of the benefits of screening and training using a comprehensive line of SpecialtyAutomated tests on road signs, traffic signals, and pavement markings. We call it the SAS Traffic Safety Line ™.

Let’s start improving highway safety now.

The green way.

SpecialtyAutomated online products provide instant feedback about whether an answer is correct or not. Where multiple tests are required, our systems will automatically advance to the next test in the queue.

Products can be configured to other languages and standards.

An audio option is available for those with limited reading proficiency.
► RSTSPM Traffic Safety Cognition ™ Test
MODEL SA-01-RSM -W

Where else can you find a test that combines road signs, traffic signals, and pavement markings? Fast and fun. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated and customizable for your state or country.

► Regal Traffic Safety Cognition ™ Test
MODEL SA-01- R2SM -08 -W

Tests on road signs, traffic signals, and pavement markings were never this useful. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. This fully automated and fast Traffic Safety Cognition test is even faster than the RSTSPM.

► Regal Traffic Safety Recognition ™ Test
MODEL SA-01- R2SM –08R -W

This test on road signs, traffic signals, and pavement markings is quick and comprehensive. Incorporates multimedia and various road signs, traffic signals, and pavement markings for recognition. Screens drivers on their ability to recognize and respond to road signs, traffic signals, and pavement markings under various conditions, in and out of traffic. Based on U.S. federal and state standards. Can be modified for other languages and countries. Automatic scoring and feedback. All-new touch screen technology powered by Sytotechnology™. Fully automated.

► SAS Traffic Safety Recognition ™ Test
MODEL SA-02-TSRC -07 -W

Recognize road signs, traffic signals, and pavement markings now through real images and scenarios that involve cognition, response, and identification. Automatic scoring and feedback. May include multimedia images of actual traffic signals according to the configuration of your state or country. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast.
SAS pk07a Traffic Safety Cognition™ Trainer
MODEL SA-03-TSCT-07-W

Learn road signs, traffic signals, and pavement markings now through a huge database of real images and scenarios involving pavement marking cognition, response, and identification. Automatic scoring and feedback. May include multimedia images of actual pavement markings. Trains drivers on how to improve their knowledge of different definitions, situations, and responses in and out of traffic. Based on U.S. and federal standards. Can be modified for other languages and countries. All-new touch screen technology powered by Sytotechnology™. Fully automated and fast. This is an ideal tool to also use in the rehabilitation and recovery of patients. Available in different languages and can be customized for your state or country.

Regal Traffic Safety Cognition™ Trainer Test
MODEL SA-01-RTS-08T-W

A huge database of real images and scenarios involving pavement marking cognition, response, and identification constitute this trainer test. Automatic scoring and feedback. May include multimedia images of actual road signs, traffic signals, and pavement markings according to the configuration of your state or country. All-new touch screen technology powered by Sytotechnology™. This is an ideal tool to train drivers or use in the rehabilitation and recovery of patients. Available in different languages.
System Requirements

Simply click and connect™.

SpecialtyAutomated screening tests, unless otherwise noted, run locally or remotely on PC systems. The screening tests are designed to be autonomous and may not require the presence of a program administrator. Instructions are presented on an introductory screen. These are followed by sample questions to familiarize the examinee with the automated screening test process.

Flash Player 6.0.79 or later (http://www.macromedia.com/go/getflash) is required. One of the following browsers is recommended for viewing the screening tests:

- **Windows 98**: (Microsoft Internet Explorer 5.x, Netscape 4.7, Netscape 7.x, Firefox 1.x, AOL 8, and Opera 7.11)
- **Windows 2000**: (Microsoft Internet Explorer 5.x, Netscape 4.7, Netscape 7.x, Firefox 1.x, CompuServe 7, AOL 8, and Opera 7.11)
- **Windows XP**: (Microsoft Internet Explorer 6.0, Netscape 7.x, Firefox 1.x, CompuServe 7, AOL 8, and Opera 7.11)
- **Windows Vista**: (Microsoft Internet Explorer 6.0, Netscape 7.x, Firefox 1.x, CompuServe 7, AOL 8, and Opera 7.11)
- **Mac OS 9.x**: (Microsoft Internet Explorer 5.1, Netscape 4.8, Netscape 7.x, Mozilla 1.x, and Opera 6)
- **Mac OS 10.x**: (Microsoft Internet Explorer 5.2, Netscape 7.x, Mozilla 1.x, AOL 7, Opera 6, and Safari 1.0 (Mac OS 10.2x or later only))
- **Linux**: (Konqueror 3.3.1, Mozilla 1.7.3, Firefox 1.x)

Options for immediate feedback, printable scores and results, or scores or results emailed to the network specialist are available. A printer is optional. For system administrator content management, at a minimum, we recommend Windows 2000, Windows 2003, and/or Windows XP (Microsoft Internet Explorer 6.x, Firefox 1.5). For Windows Vista, please consider Microsoft Internet Explorer 7.x, Firefox 1.5, at a minimum. An Internet connection is needed for all web-based screening tests. Online tests also allow for collection and analysis of data. Speakers or a headset are needed for the optional audio format.

Most screening tests are designed to take less than 5 minutes to complete. Some screening tests may take as little as three minutes (from the start screen to the completed questions). Training tests and exercises are developed to take more than 5 minutes to complete in order to optimize performance.

Traffic Safety Cognition Test II 105
Traffic Safety Cognition Trainer Test II 105
INDEX

Traffic Safety Recognition Test I 105
► Traffic Signal Cognition™ Test 98
Traffic Signal Cognition Test I 98
Traffic Signal Cognition Test II 98
Traffic Signal Cognition Trainer Test II 99
TRAFFIC SIGNAL IDENTIFICATION TESTS 97
Traffic Signal Recognition Test I 98
Traffic Signal Recognition Test II 99
Traumatic Brain Injury & Memory Test Battery 28
TRAIL MAKING TESTS 32
Trail Making Test, Part A  See TRAIL MAKING TESTS
Trail Making Test, Part B  See TRAIL MAKING TESTS
TRAUMATIC BRAIN INJURY SCREENING TEST 29
► Truck Driver Dynamic Visual Acuity Test 57
►► Truck Driver Static Visual Acuity Test 50
Tumbling E Night Visions Screen 78
► Tumbling E Night Visions Trainer™ 78
Tumbling E Static Visual Acuity and Color Vision Screen 46
Tumbling E Static Visual Acuity and Color Contrast Sensitivity Screen 74
Tumbling E Static Visual Acuity, Color Vision, and Night Vision Screen 77
Tumbling E Static Visual Acuity Contrast Sensitivity and Night Vision Screen 77
Tumbling E Static Visual Acuity Contrast Sensitivity Screen 45
Tumbling E Static Visual Acuity, Night Vision, and Color Contrast Sensitivity Screen 74
Tumbling E Static Visual Acuity Screen 45
► Tumbling E Stat-VAC2S™ 74
►► Tumbling E Stat-VACV™ 77
► Tumbling E Stat-VACS™ 45
► Tumbling E Stat- VACSNV™ 74
► Tumbling E Stat-VACV™ 46
►► Tumbling E Stat- VANV™ 78
► Tumbling E Stat-VAS™ 45
TUMBLING E VISION SCREENING TESTS 64

Vision Screening Test Battery for Pilots 47
►► Vision Test Battery for Truck Drivers 50
